Step 1 — USB/Headphones Jack

- Remove the eight 4mm PH00 screws.

- Remove the four 2mm PH00 screws.

Step 2

- Use the nylon spudger to loosen the back cover from the back of the device.

⚠️ You may hear a bit of a snapping sound, but this is normal.

Step 3

- For safety reasons, disconnect the wires connecting the battery to the motherboard with the nylon spudger.
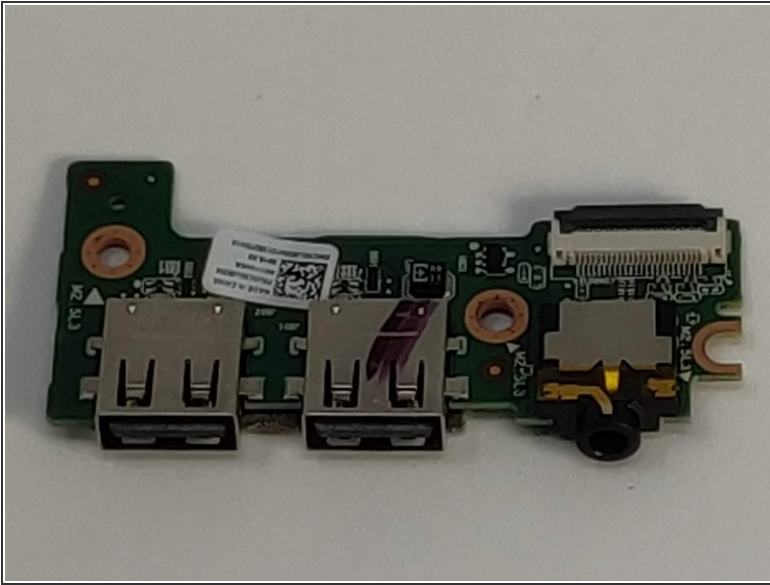

Step 4

- Remove the three 4mm PH00 screws.

- Unplug the ribbon wire connected to the USB/Headphone Jack PCB by lifting the black plastic tab holding the ribbon cable down.

- ⚠ Be extra careful not to bend the ribbon cable too much as it is fragile.

Step 5

- Lift the USB/Headphone Jack PCB off of the board gently and put it to the side.

To reassemble your device, follow these instructions in reverse order.
