

Lenovo IdeaPad S400 Touch Fan Replacement

How to replace the fan in a Lenovo IdeaPad S400 Touch.

Written By: Max Hoyle

INTRODUCTION

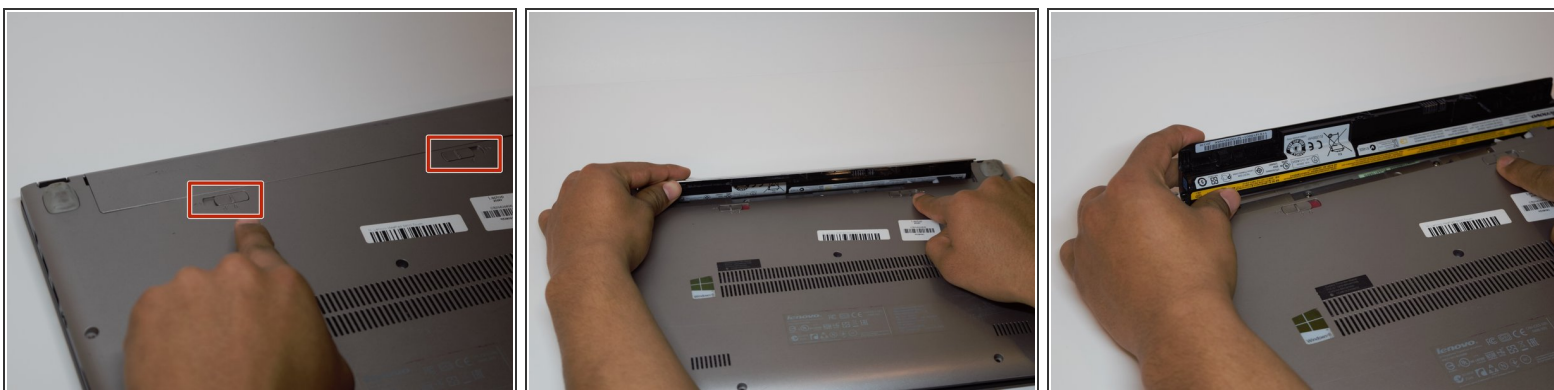

To replace the fan, follow this guide.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Battery

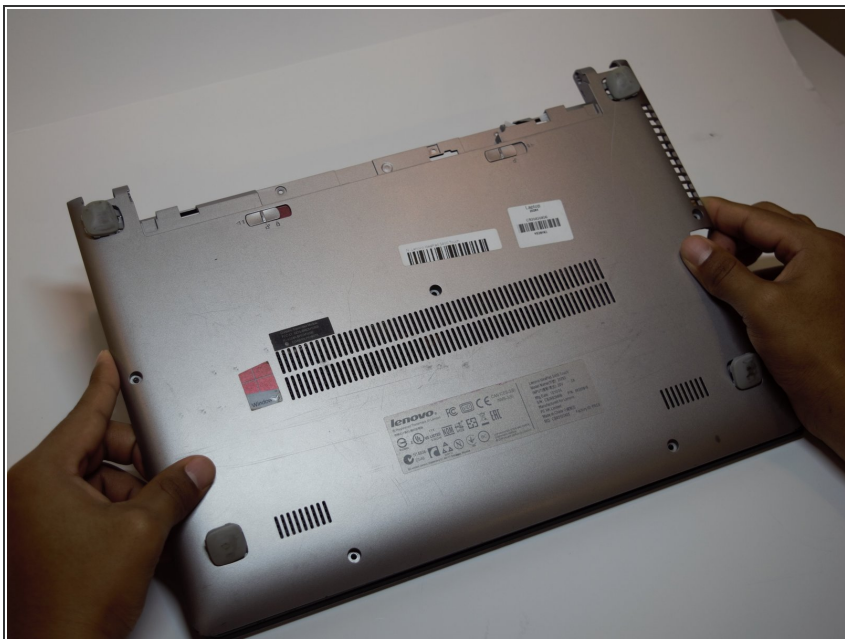

- Turn your computer over so the back is face up.
- Use your forefinger to unlock the two tabs located on the back. Slide the tabs until you see the red showing.
- The battery cover will then pop up allowing you access to the battery.

Step 2 — Fan

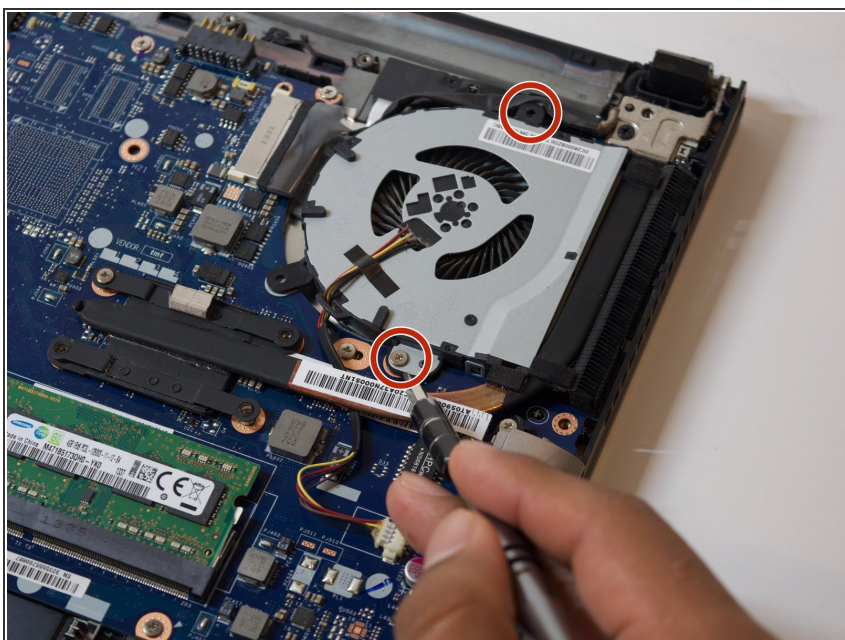

- Remove the five 6mm Phillips #0 screws from the back panel.
- Pull back the rubber tabs from the corners of the laptop backing to expose the screws.
- ⓘ The two tabs next to the battery flip toward the battery. The two remaining tabs flip down, away from the battery.
- Remove the four 4mm Phillips #0 screws that are underneath the rubber tabs.
- Remove the three 6mm Phillips #0 screws from under the battery.

Step 3

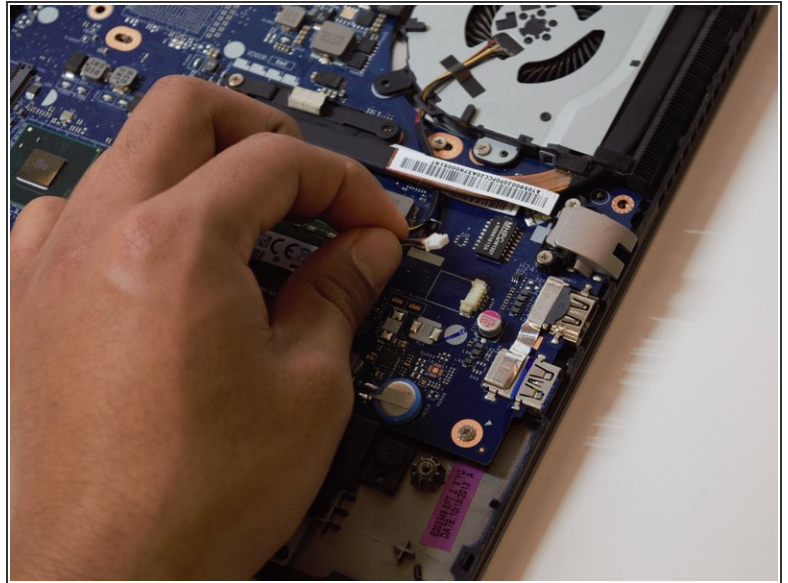

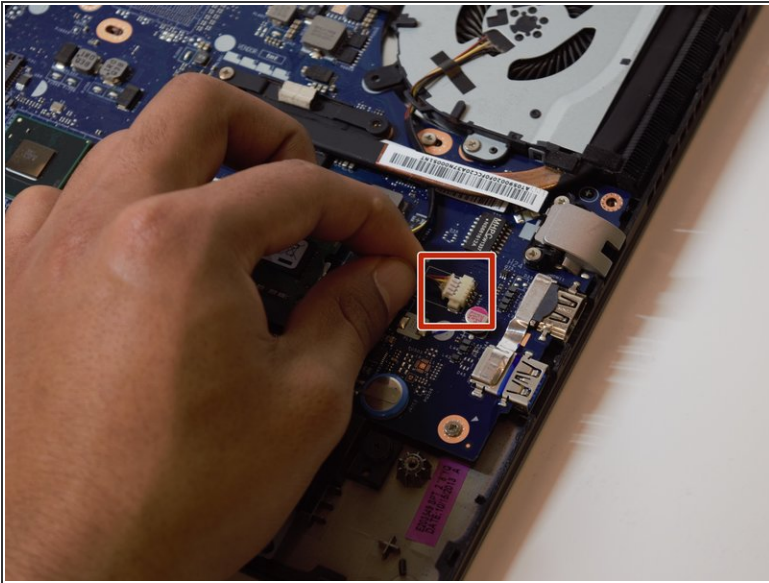

- Slide the back panel away to remove it.
- ⓘ Don't be afraid to apply force when removing the back panel.

Step 4

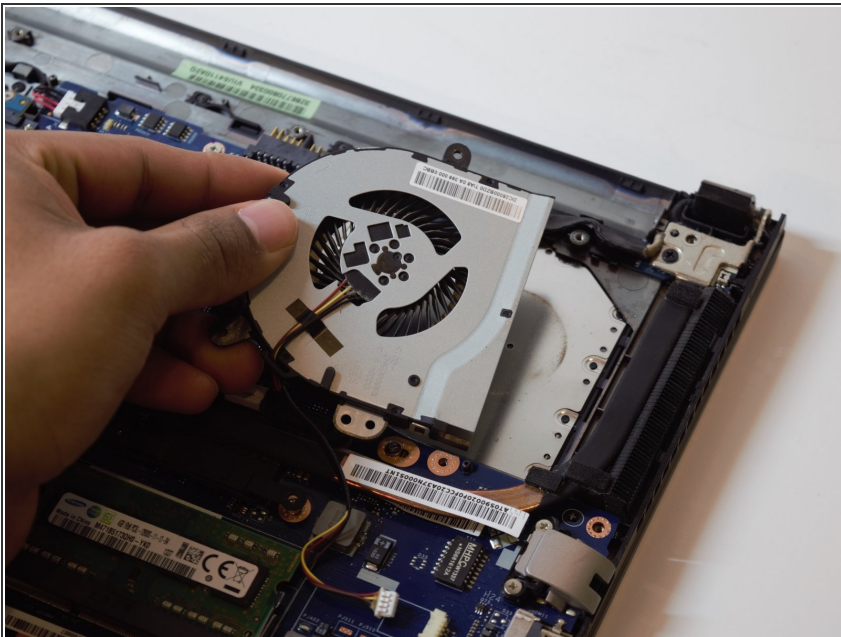

- Remove the two 5mm Phillips #0 screws holding the fan down.

Step 5

- Unplug the fan's power supply cord.

Step 6

- Pull the fan out.

To reassemble your device, follow these instructions in reverse order.
