 **TOOLS:**

- Phillips #1 Screwdriver (1)
- Metal Spudger (1)
- iFixit Opening Tools (1)

## Step 1 — Bottom Cover

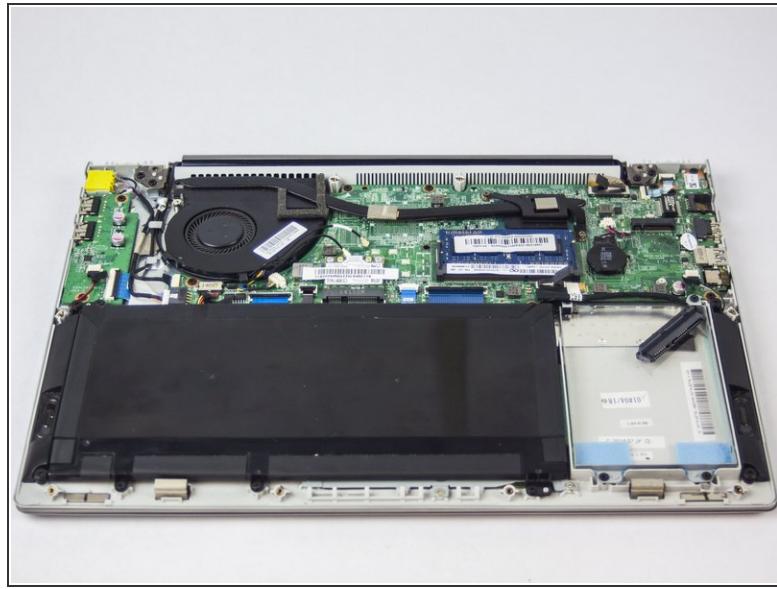

- Power off your computer before you begin.
- Find and remove the 10 Phillips style body screws on the bottom of the laptop case.

## Step 2

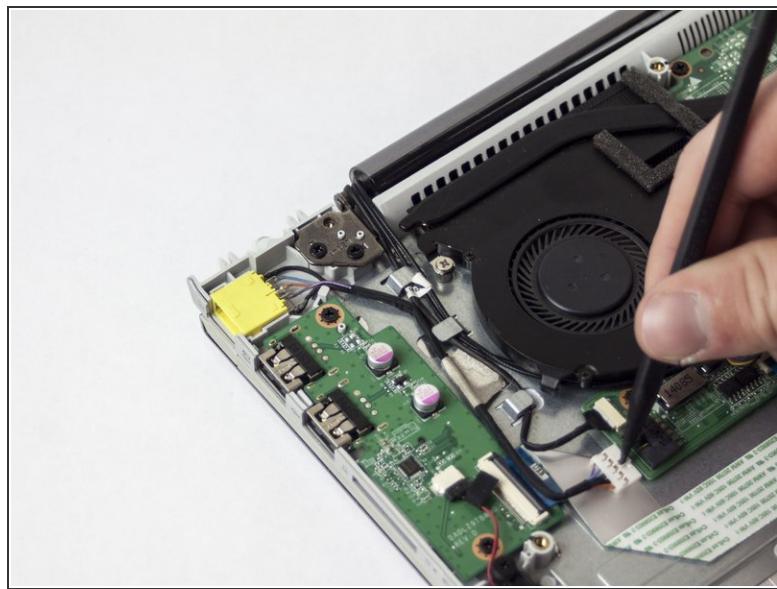

- Remove 2 screws, 1 located on the left hinge cover and one located on the right hinge cover.

## Step 3

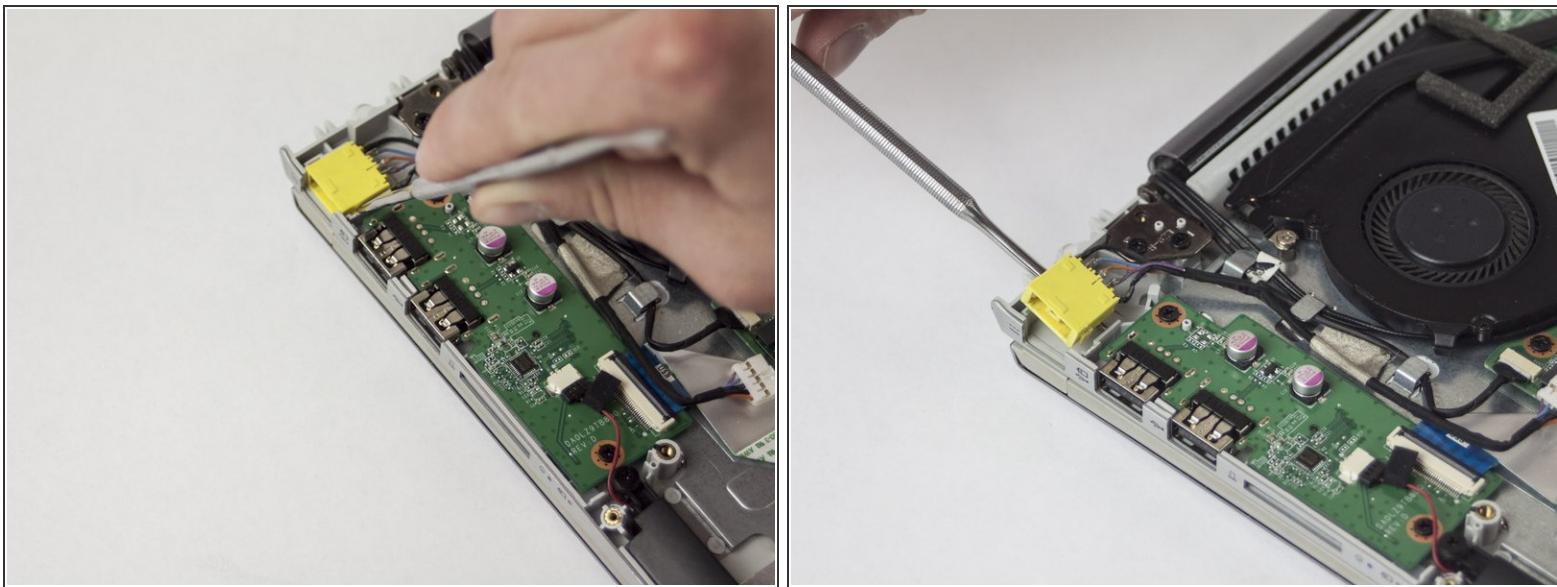

- Starting from the front, use a plastic opening tool to separate the bottom of the case from the body of the laptop.

## Step 4 — Charging Port

- Disconnect charging port from motherboard.
- To do this, press the spudger on the center dimple and push the connector out.

## Step 5

- Pry the charging port out of the socket with a metal spudger.
- It may be necessary to pry from each side.

## Step 6

- Remove charging port from laptop.

To reassemble your device, follow these instructions in reverse order.
