

Lenovo IdeaPad U450 Keyboard Replacement

Lenovo IdeaPad U450 keyboard replacement.

Written By: Rachel L Rodrigues

INTRODUCTION

The keyboard is an essential part of your computer and this guide will take you through the steps to replace your damaged one.

TOOLS:

- [Metal Spudger](#) (1)
 - [Phillips #0 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — Battery

- ⚠ Turn off and unplug your laptop to prevent the risk of electrocution.
- Turn your laptop over so that the bottom is face up.

Step 2

- ⓘ On the top left of the laptop there is a switch. Make sure it's pushed in the unlocked position.

Step 3

- Locate the switch collinear with the last one and move the switch to an unlocked position.

Step 4

- Remove the unlocked battery.

Step 5 — Keyboard

- Flip the laptop so it's facing upwards.

Step 6

- Open the laptop.

Step 7

- Press the most northern region above F6 and F7 until a bit of your keyboard pops out.

Step 8

- Use the spudger to pry the top of the keyboard out.

Step 9

- Disconnect the wire connecting to keyboard to the laptop.

Step 10

- Remove the keyboard

To reassemble your device, follow these instructions in reverse order.
