Step 3

- While holding the right battery lock in the unlock position, slide the battery carefully out of the laptop and set it aside.
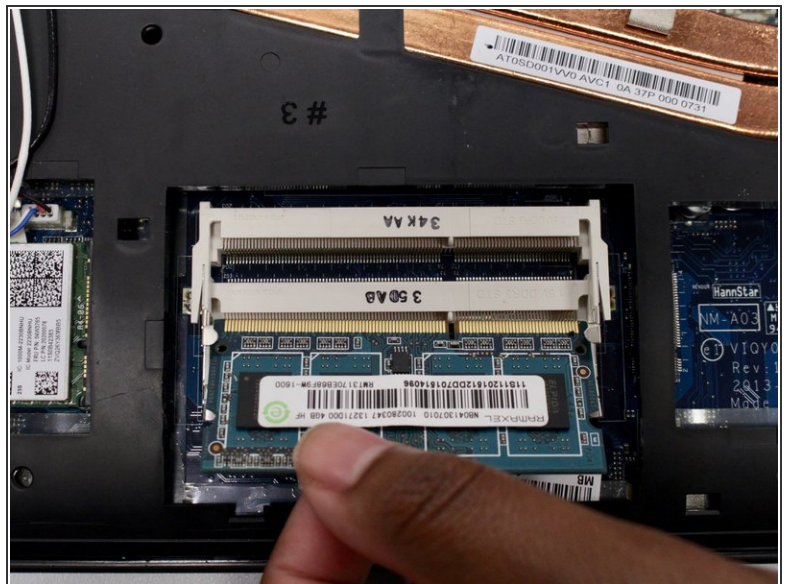

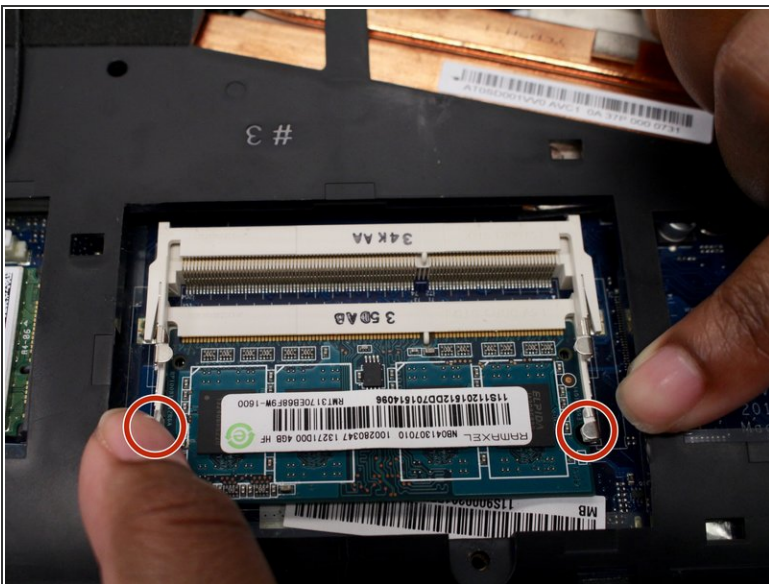

Step 4 — Ram

- Using the Phillips #0 screwdriver remove the eight 8mm screws that fasten the bottom cover.

- Lift the bottom cover off using a metal spudger and set it aside.

Step 5

- Simultaneously pull apart both clips that are holding the RAM module down.

- When the RAM module is released carefully pull it out.

Step 6

- (i) There is a second ram module under the first one.

- Repeat Step 5 with lower Ram module.
