

# Lenovo IdeaPad Yoga 13 Wi-Fi Card Replacement

This guide will teach you how to remove the Wi-Fi card in your Lenovo IdeaPad Yoga 13.

Written By: Hashim Adel Jaber

## INTRODUCTION

Replacing the Wi-Fi card is a semi-invasive repair and should only be attempted if your computer is not recognizing a wireless antenna. This symbol in the hot-bar on the bottom right that normally indicates a wireless connection will appear to be a small box with a wire coming out.

**NOTE:** It is VERY important to make sure to check that Wi-Fi is NOT DISABLED on your device before attempting this repair, as this may be the problem and a repair attempt will only increase the chances of causing damage.

### **TOOLS:**

- [iFixit Opening Tools](#) (1)
- [Metal Spudger](#) (1)
- [Tweezers](#) (1)
- [T4 Torx Screwdriver](#) (1)
- [Phillips #0 Screwdriver](#) (1)

## Step 1 — Wi-Fi Card

- Remove the ten screws on the back panel of the laptop using the T4 Torx screwdriver.
- Remove the back panel from the device.

## Step 2

- Use blue the opening tool to gently further separate the keyboard bezel.
- Carefully apply pressure to the keyboard. It should easily pop out.

## Step 3

- To remove the keyboard bezel (black cover containing the mouse pad) remove the five screws using the Phillips #0 screwdriver.

## Step 4

- Unplug the connections from motherboard, including the mouse and keyboard connections.

## Step 5

- Remove the outer bezel to reveal the entire internal layout of the computer.

## Step 6

- Remove the ribbon cable covering the card by disconnecting the two connection points on either side.

## Step 7

- Disconnect the white and black antenna cables.

## Step 8

- Lift up the bottom right lever on the WiFi card metal bracket.
- Slide the bracket to the left to disconnect it from the 4 plastic legs holding it down.

## Step 9

- Lift and remove the card.

To reassemble your device, follow these instructions in reverse order.
