Step 1 — Battery

⚠ Ensure that your device is completely OFF before performing this procedure.

● Unscrew the eleven 4 mm Phillips #0 screws on the bottom of the device.
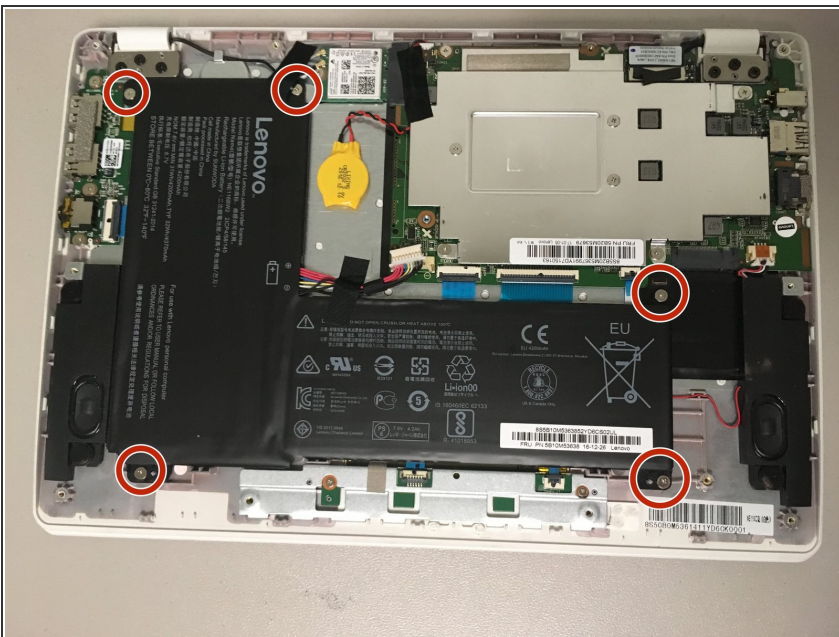

Step 2

● Separate the back lid from the laptop using a plastic opening tool.

● Lift the back lid off of the device.

Step 3

- Remove the battery connector from its socket by pulling the cable away from the hinge using your fingers or a plastic opening tool.

  ⚠ Do not pull on the socket itself or you risk damaging the motherboard.

- Remove the two pieces of tape that are holding the battery down.

Step 4

- Remove the five 4 mm Phillips screws securing the battery.
