

# Lenovo Ideapad 310-15IKB Hard/Solid State Drive Replacement

This guide will help replace a damaged hard drive and/or help upgrade to a solid state drive of your Ideapad 310-15IKB.

Written By: Bryant Bernard

## Step 1 — Hard/Solid State Drive

- Using a small Philips head screwdriver, remove the screw as shown
- Lift up and remove the protective plate

## Step 2

- Using your hand, grab the drive from the left side and remove the hard drive by sliding it out to the left

## Step 3

- Remove the hard drive.

To reassemble your device, follow these instructions in reverse order.
