INTRODUCTION

Use this guide to safely remove the battery from your Lenovo Ideapad.

For your safety, drain your Lenovo Ideapad's battery before you begin this procedure. A charged lithium-ion battery can create a dangerous and uncontrollable fire if accidentally punctured. If your battery is swollen, take extra precautions.
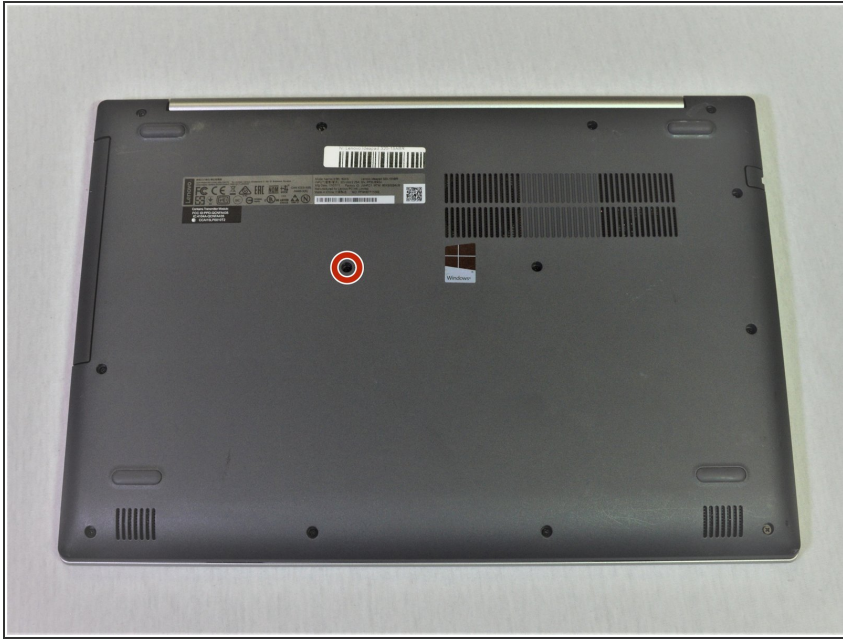

TOOLS:

- Phillips #1 Screwdriver (1)
- iFixit Opening Tools (1)

PARTS:

- Lenovo IdeaPad 330 and 320 Replacement Battery (1)

Step 1 — Back Panel

⚠ Before you proceed, make sure your computer is turned off and is not connected to any power source.

● Remove the single 7 mm Phillips #1 screw securing the optical drive.

ⓘ Be sure to store the screws carefully as they are easy to lose. A magnetic project mat is recommended
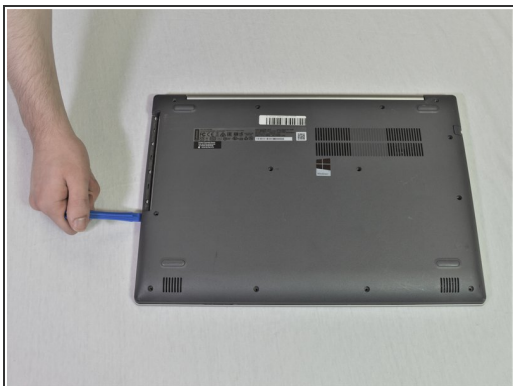

Step 2

● Carefully remove the optical drive bracket by pulling the bezel away from the laptop.

Step 3

- Using the Phillips #1 screwdriver, remove the twelve screws around the back panel from the laptop.
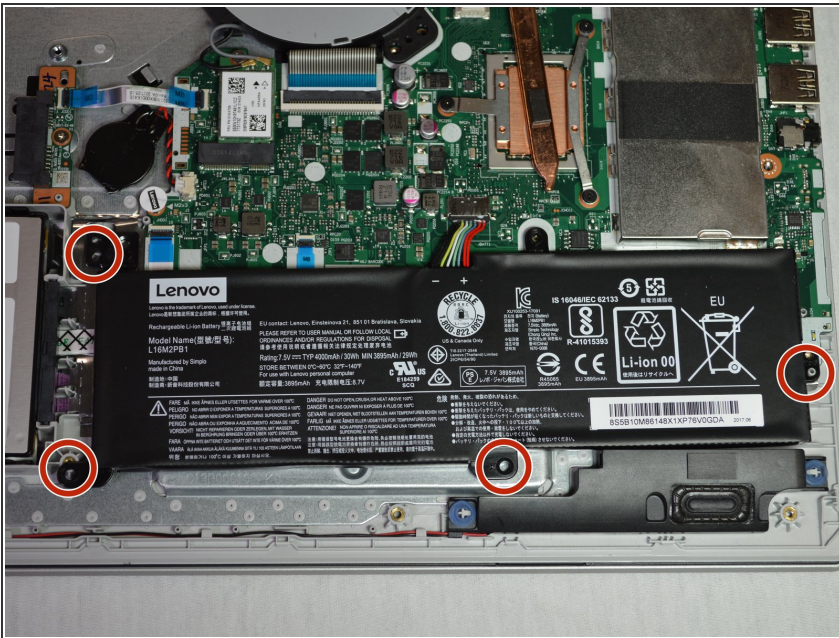

Step 4

- Use an opening tool to pry out the back cover.
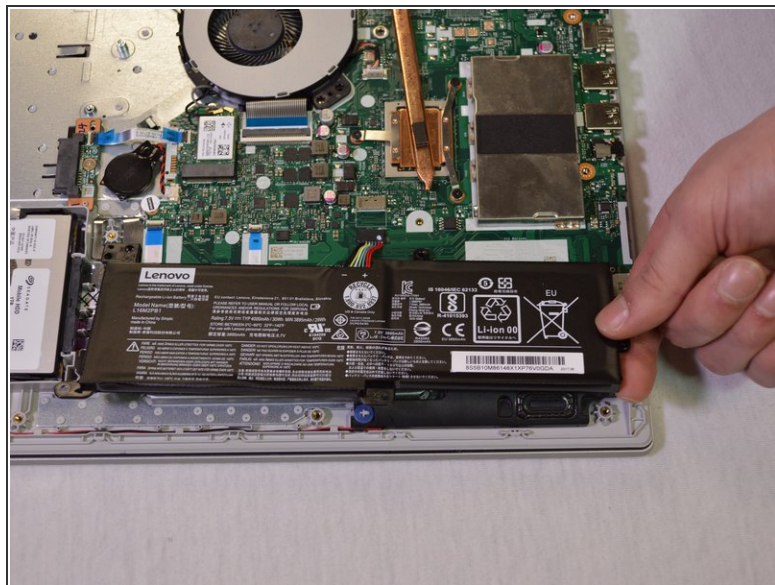

| |

Step 5

- Remove the back panel by pulling it up and away from the laptop.

Step 6 — Battery

- Remove the four 6mm screws using the Phillips #1 screwdriver.
