

# Lenovo Ideapad S415 Touch Hard Drive Replacement

How to replace the hard drive.

Written By: Casey Zhang

## INTRODUCTION

If your computer will not turn on, there may be a problem with the hard drive. This guide will help replace the hard drive in your laptop, and is moderately difficult. Make sure to have a Phillips #0 screwdriver on hand to achieve the steps in this guide.

### TOOLS:

- **Phillips #0 Screwdriver (1)**

## Step 1 — Battery

- Flip laptop over bottom side up.
- Locate the two battery release switches.

## Step 2

- Use your finger to push the battery release switch labeled "1." The red indicates that the switch is unlocked.

## Step 3

- Use your finger to push the battery switch labeled "2."

## Step 4

- Once both switches are unlocked, the battery will release.

## Step 5

- When replacing the battery make sure the two protruding holes line up with the slot.
- Carefully remove the battery.

## Step 6 — Hard Drive

- Locate the five black screws on the back.
- Use a Phillips #0 screwdriver to remove all five black 6 mm screws.

## Step 7

- Locate the three silver screws underneath the battery.
- Use the Phillips #0 screwdriver to remove all three 4 mm screws.

## Step 8

- Locate the four rubber stoppers near each corner of the laptop.
- Open up the stopper with your hands.
- Use the Phillips #0 screwdriver to remove the 6 mm screws underneath all four stoppers.

## Step 9

- Open the laptop carefully.

## Step 10

- Locate the hard drive.
- Use the Phillips #0 screwdriver to remove the two 4 mm screws that are holding the hard drive in place.

## Step 11

- The hard drive is now removed from the laptop.

## Step 12

- Once the hard drive is removed, locate the four screws that hold the metal frame to the hard drive.
- Use the Phillips #0 screwdriver to remove the 4 mm silver screws on all sides.

To reassemble your device, follow these instructions in reverse order.
