

# Lenovo Ideatab S6000 Speakers Replacement

This guide will show you how to solder on new speakers.

Written By: Josiah Speed

 **TOOLS:**

- [Phillips #00 Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)
- [Spudger \(1\)](#)
- [Solder \(1\)](#)
- [Soldering Iron \(1\)](#)

 **PARTS:**

- [Speakers \(1\)](#)

## Step 1 — Battery

- Remove the speaker screens by working them loose with a plastic opening tool. You may need to first loosen them with tweezers or a craft knife.

⚠ These screens are held in place by glue that is hard to remove. Please take your time to ensure that that this step is done correctly.

## Step 2

- Remove the screws from both of the spots that were covered.

## Step 3

**⚠ DO NOT USE A METAL TOOL FOR THIS.**

- Go all around the casing, prying the screen away from the backing with the spudger.
- It will make a popping sound each time one of the lock tabs is disconnected.
- **ⓘ Take your time as you move all around the device when prying the backing off.**

## Step 4

- Pull off the plastic that is covering the battery cable.

## Step 5

- Using either the plastic opening tool or your fingers, gently pull on both sides of the plug to release it.

## Step 6

- Remove the battery by grabbing the tab shown and pulling up.
- The battery is held to the device by adhesive. Pull the battery up from the tab and it will lift out with a bit of effort.

## Step 7 — Speakers

- The speakers are connected to the tablet by glue and require a lot of prying to remove.
- Make sure to get all the way under the speakers when prying.

## Step 8

*(i)* This step is not necessary if you aren't replacing the speakers.

- To the remove the wires heat the solder connecting the wires to the board, and gently pull on the wires.
- (i)* Remember the placement of the red and black wires.
- Connect new speakers by soldering the wires onto the board.

To reassemble your device, follow these instructions in reverse order.
