INTRODUCTION

This guide will teach the reader how to take apart the case of the Lenovo Tab2 A7-20F.

TOOLS:

- [Metal Spudger](#) (1)
-

Step 1 — Case

- Starting at any point along the seam of the case carefully pry it open with the metal spudger, slowly working your way around the outside until the case can come apart.
- ⓘ The second photo shows the view that should greet you once the case has been taken apart.

To reassemble your device, follow the steps in reverse order.
