---

## TOOLS:

- [Phillips #0 Screwdriver](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — CMOS / BIOS Battery

- Remove the CMOS Battery Cover.
- Disconnect the CMOS Battery Cable.
- Use a sharp edge of a plastic tool to unstick the battery.
- This is Lithium Battery, 3.0 Volts, model CR2032, but it's extra packed with wires.

To reassemble your device, follow these instructions in reverse order.
