

Lenovo ThinkPad T480s RAM Replacement

How to insert new RAM in T480s

Written By: Alex Merchen

INTRODUCTION

This is a guide to insert new RAM into T480s. I am using Kingston KCP424SS8/8 8GB Memory Module.

TOOLS:

- [Phillips 0 Screwdriver, spudger](#) (1)

PARTS:

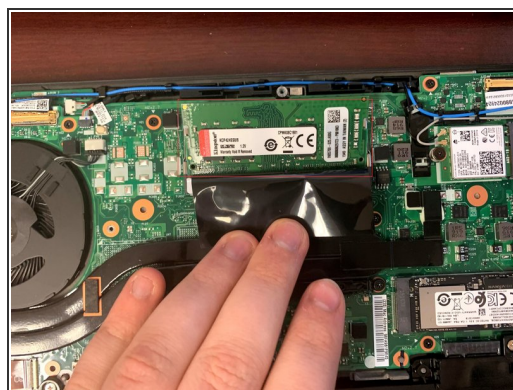

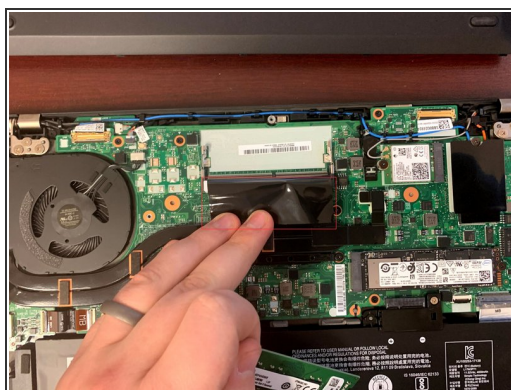

- [Kingston - DDR4 - 8 GB - SO-DIMM 260-pin - unbuffered](#) (1)

Step 1 — Take out screws

- Take out the six screws around the back of the laptop
- Lift the back off from the hinge side, spudger will help in this.

Step 2 — Inserting RAM

- Fold down the black cover
- Insert the RAM
- Clip it down

Step 3 — Reassembly

- Reassemble the back and turn it on

To reassemble your device, follow these instructions in reverse order.
