

# Lenovo ThinkPad X1 Yoga Hard Drive Replacement

How to replace a hard drive for the Lenovo ThinkPad X1 Yoga.

Written By: Sam Lanning

## INTRODUCTION

This repair guide is to remove and replace the hard drive on the Lenovo ThinkPad X1 Yoga (Model Number: 20FQ005YUS). The hard drive is the storage for the computer; if your computer is running slowly or doesn't have enough space to save documents, you may want to update your hard drive.

**Warning:** We recommend backing up your files onto an external drive or a cloud before replacing your drive, otherwise you won't be able to access them!

### TOOLS:

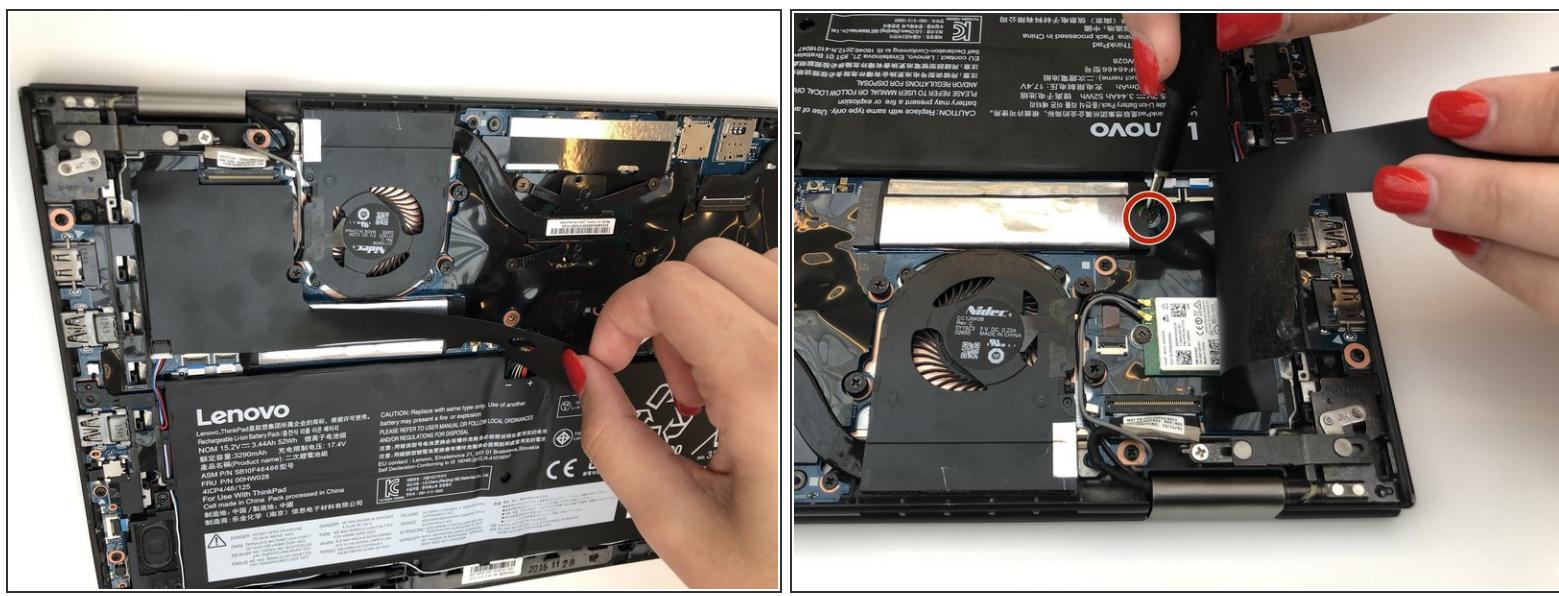

- [Phillips #1 Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)

## Step 1 — Back Cover

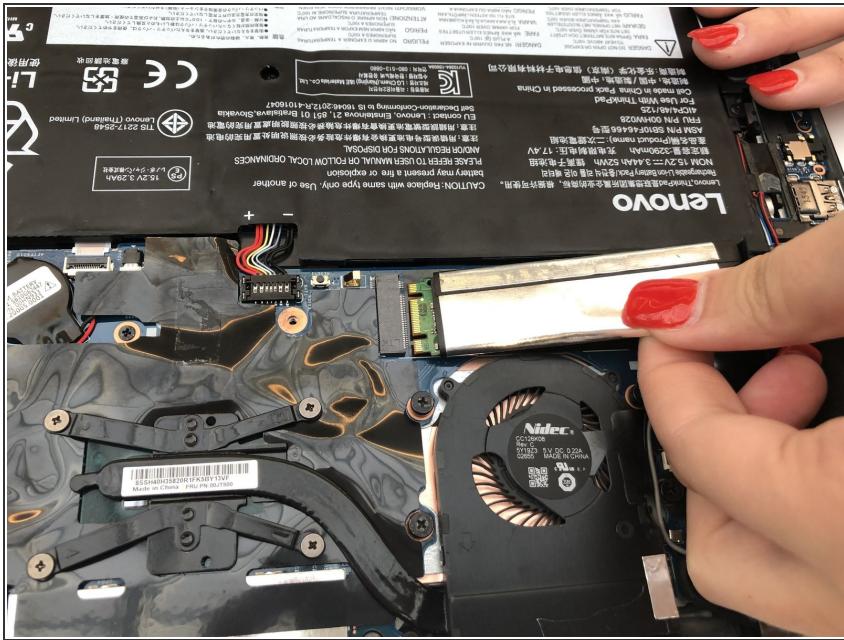

- Flip the computer over so the bottom is facing up.
- Remove nine 4mm Phillips #1 screws from the bottom of the computer.
- Use an iFixit opening tool to pry the back cover off of the laptop.

## Step 2 — Hard Drive

- Gently peel back the black plastic covering.
- Remove the single 2mm Phillips #1 screw from the hard drive's silver casing.

## Step 3

- Unplug the hard drive from the computer by pulling away from the computer.

To reassemble your device, follow these instructions in reverse order.
