Written By: Mohammed Alsaadi

INTRODUCTION

Having a problem with Hard Disk in your Lenovo X240 ? Follow along while we show you how to get it replaced! All you need is your iFixit Toolkit.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

PARTS:

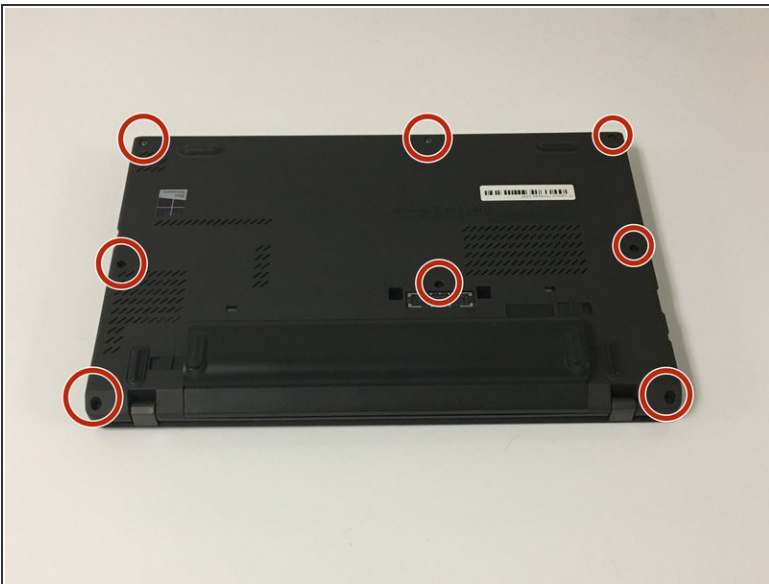

- [1 TB SSD / Upgrade Bundle](#) (1)
- [250 GB SSD / Upgrade Bundle](#) (1)
- [500 GB SSD / Upgrade Bundle](#) (1)
- [2 TB SSD / Upgrade Bundle](#) (1)

Step 1 — Hard Disk Drive and Solid State Drive

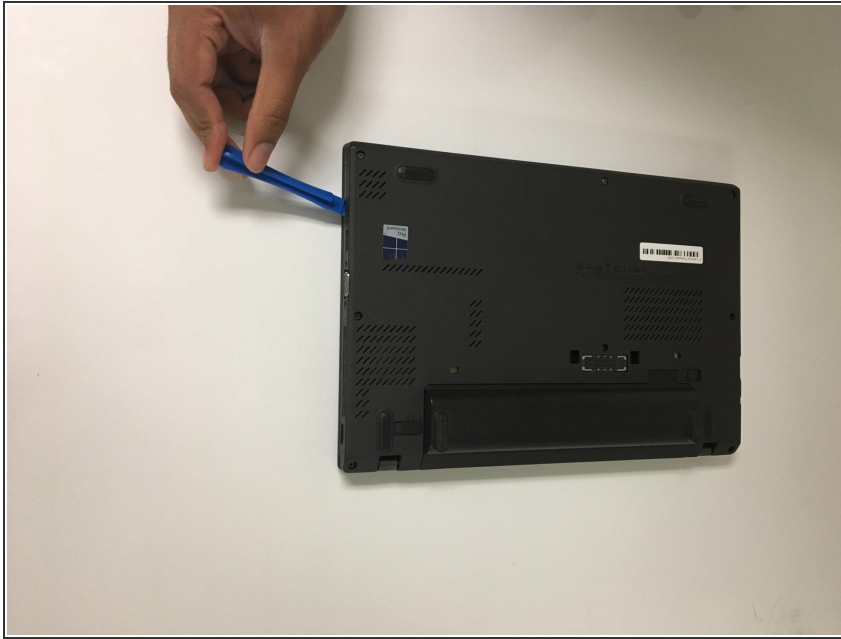

- Flip the laptop upside down as shown in the photo.

Step 2

- Remove the 8 0.2mm Phillips screws connecting the back cover to the laptop.

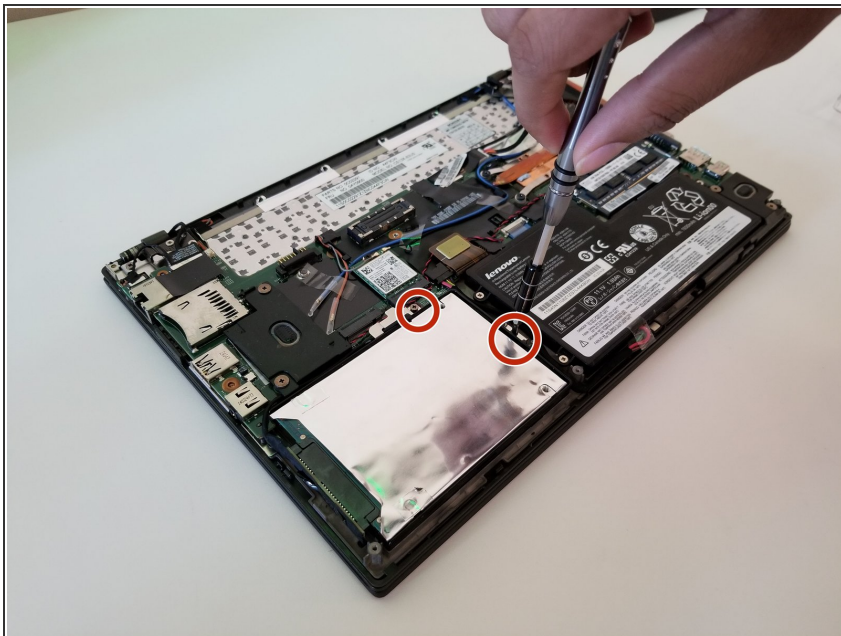

Step 3

- Remove the back cover using the opening tools.

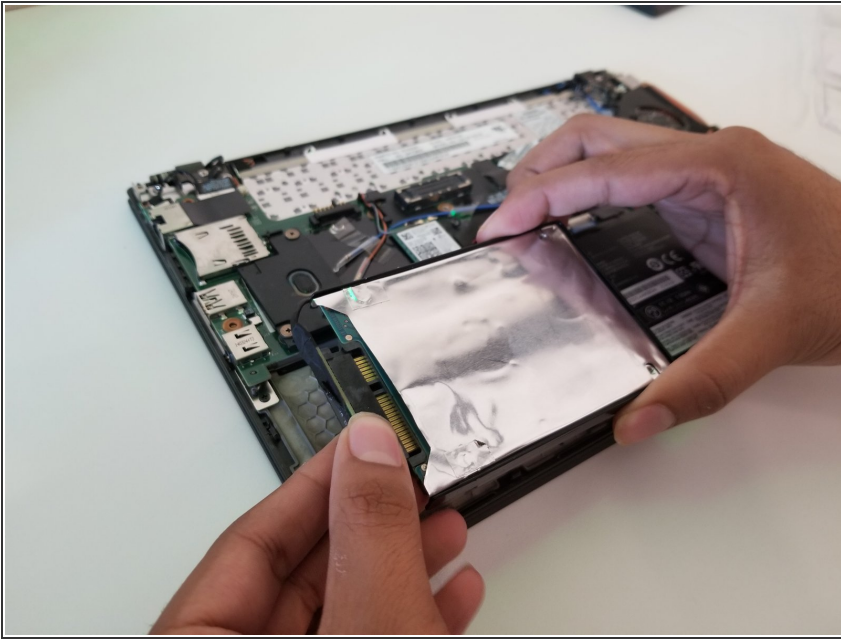

⚠ Gently use the plastic opening tools to prevent scratching your device.

Step 4

- Remove the Hard Disk Drive card by screwing the 2 0.2mm Phillips screw

Step 5

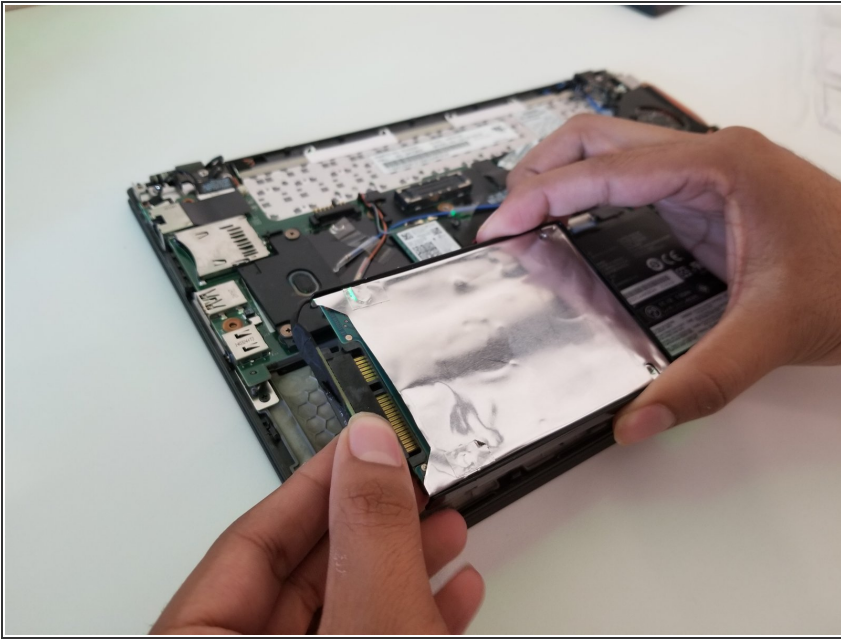

- Disconnect the SATA cable from the hard drive.

Step 6

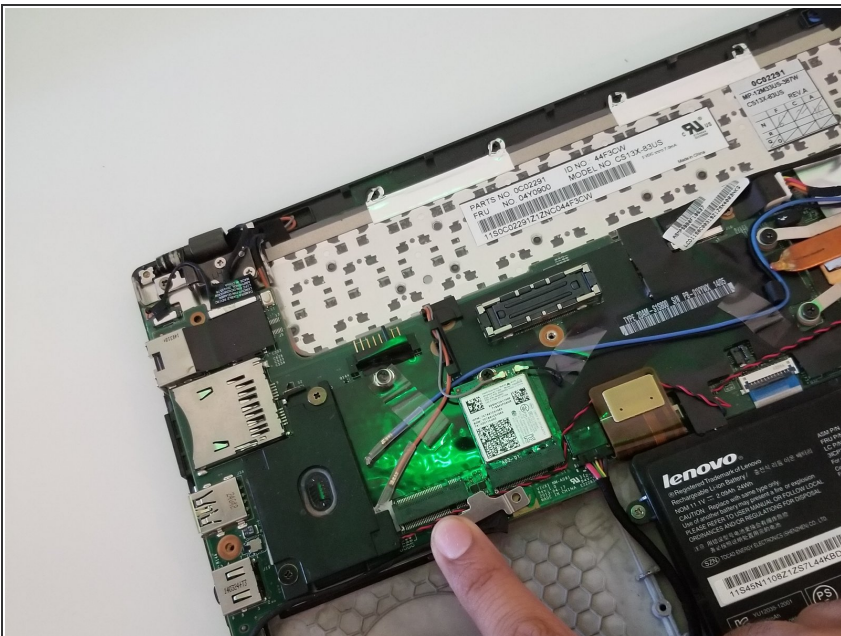

- Take off the connector by carefully popping its holders out of place

Step 7

- Reconnect the cable the new Hard Disk Drive

Step 8

- place the connector in order to hold the cable

Step 9

- Place the new Hard Drive Disk

To reassemble your device, follow these instructions in reverse order.
