## INTRODUCTION

This guide explains how to safely remove the battery from your Lenovo Thinkpad Yoga 14 20FY.

### TOOLS:

- Mako Driver Kit - 64 Precision Bits (1)

## Step 1 — Back Cover

- Remove the indicated nine M2 x 6 mm nylon-coated screws using a Phillips head screwdriver.
- *i* The screws do not come all the way out. Do not force them out.

## Step 2

- After removing all of the screws, gently lift up on all covers to remove the back plate and reveal the interior of the device.

## Step 3 — Battery

- Locate the battery of the laptop.

## Step 4

- To remove the battery, use a Phillips head screwdriver to unscrew four screws. They are located at the four corners.

## Step 5

- There will also be a clip that attaches the battery to the rest of the laptop. Unclasp the clip from its holding to completely free the battery.

## Step 6

- Once all wires are detached from the rest of the computer, remove the battery from the laptop and replace.

To reassemble your device, follow these instructions in reverse order.
