

# Lenovo Thinkpad T440s Fan Replacement

This guide will show how to replace the fan on the Lenovo Thinkpad T440S.

Written By: Terelle Montalvo

## INTRODUCTION

Is your laptop heating up too quickly or making loud noises? Consider using this guide to replace the fan in your device.

### TOOLS:

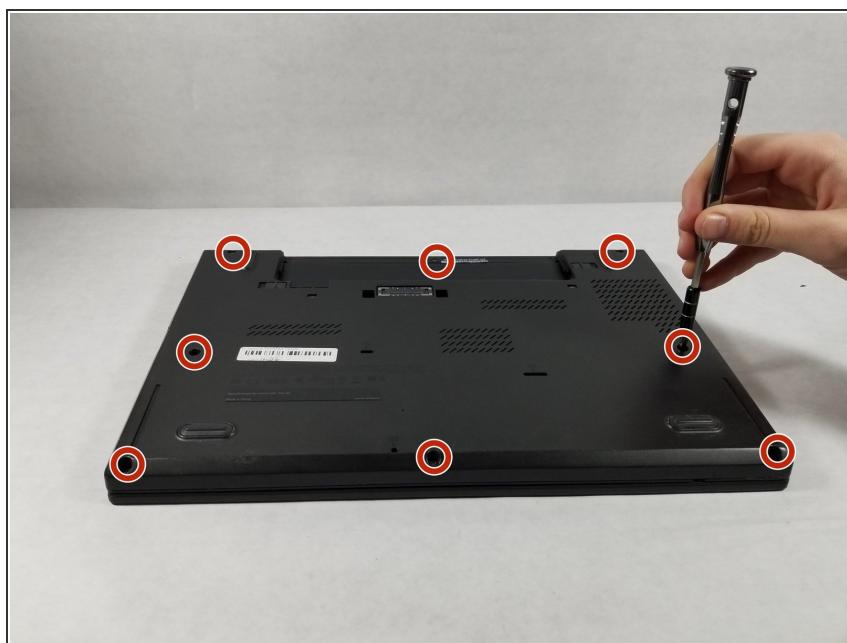

- [Phillips #1 Screwdriver](#) (1)
- [Metal Spudger](#) (1)

## Step 1 — Back Panel

- Make sure to power down and turn off your device before proceeding with the repair.
- Flip your laptop over so that the backside is facing you.

## Step 2

- Using a Phillips #1 screwdriver, remove the eight screws securing the backplate.

## Step 3

- Using the metal spudger, wedge it in the seam where the backplate meets the front plate and run the tool along the seam to separate the backplate.

## Step 4

- Remove the back panel from the device.

## Step 5 — Fan

- Use the Phillips #1 screwdriver to remove the four screws holding in the fan assembly.

## Step 6

- Lift the fan out of it's compartment to gain access to the cable connection, firmly grab the cable and pull it out of it's housing.

To reassemble your device, follow these instructions in reverse order.
