

# Lenovo Thinkpad X220 Keyboard Replacement

This guide will help you replace your keyboard for your Lenovo Thinkpad X220.

Written By: Mariska Gramlow

# INTRODUCTION

This is an old version of this guide, use the new one [here](#).

## TOOLS:

- Metal Spudger (1)
- JIS Driver Set (1)

## Step 1 — Battery

- Locate the two switches that lock the battery.
- Then push the left switch outward into the "unlocked" position.
- *(i)* This switch will remain in the unlocked position.

## Step 2

- Now push and hold the right switch to the right while using the other hand to gently slide the battery upwards out of the laptop.

## Step 3

- This is a rechargeable Li-Ion battery that has a capacity of 4400 mAh, if you have the 6 cell model.
- ☒ The 4 or 9 cell model has different ratings.

## Step 4 — Keyboard

- Remove the two J00 screws on the backside.

## Step 5

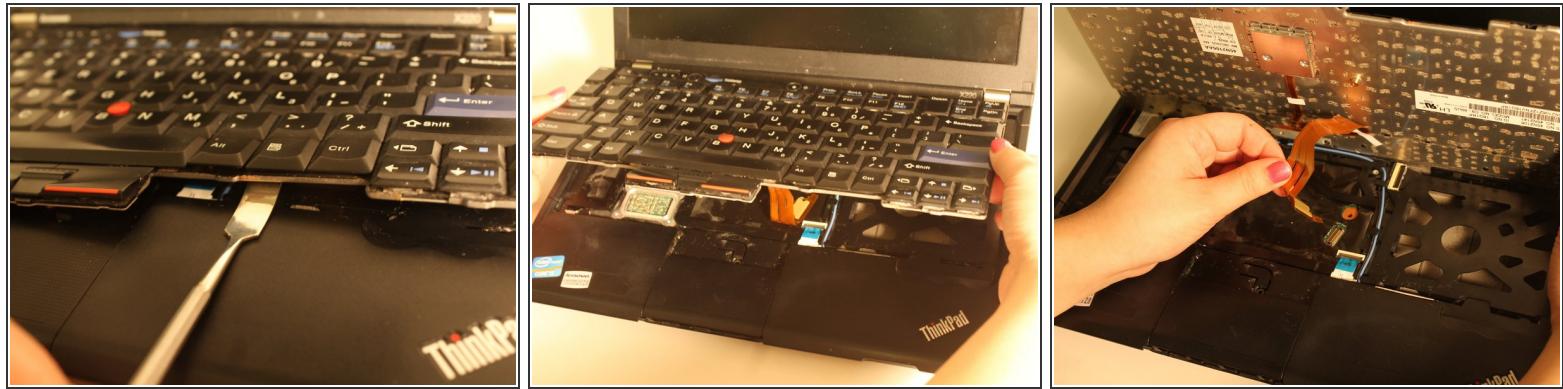

- Remove the plate next to the battery.
- Remove the side panel.

## Step 6

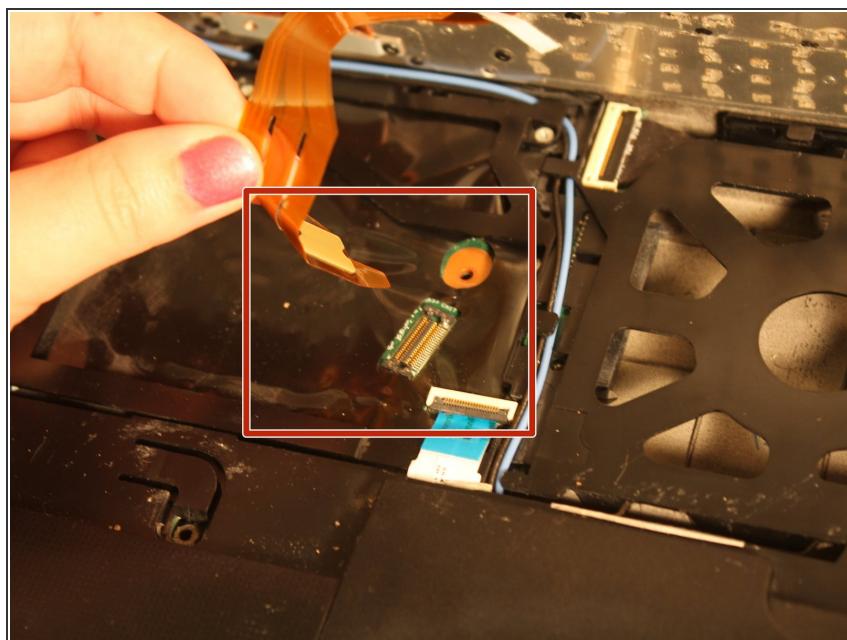

- Close laptop.
- Flip laptop over so battery side is facing down.
- The screen needs to be open when separating the keyboard and trackpad from the base.

## Step 7

- Using the Metal Spudger, place between the trackpad and the keyboard and lift up to remove the keyboard and trackpad.
- Pull keyboard towards yourself.
- Grab the tab on the ribbon wire, pull off to release the keyboard.
- Pull keyboard towards yourself exposing the ribbon wire that attaches it.
- Grab the tab on the ribbon wire and pull up to release.

## Step 8

- Grab new keyboard and clamp the ribbon into place.
- Gently push the sides of keyboard into place.
- Keyboard is now replaced and ready for use.

To reassemble your device, follow these instructions in reverse order.
