INTRODUCTION

This guide will properly show how to remove and replace the hard drive component for a Lenovo Yoga 2 11" 20428. When removing the hard drive be sure to have the laptop turned off and the battery disconnected.

## 🔧 TOOLS:

- T4 Torx Screwdriver (1)
- Phillips #00 Screwdriver (1)

This document was generated on 2019-12-28 08:17:53 AM (MST).
Step 1 — Back Panel

- Flip the computer over so the bottom is facing up.

- Remove the ten 6mm screws with a T4 Torx security screwdriver.

Step 2

- Carefully remove the back panel by gently prying the panel from the front to the back.

- ⚠ Take care not to pull any wires or crack the outer shell.

Step 3 — Battery

- Remove six 3.3 mm Phillips #00 screws around the perimeter of the battery.

- Remove one 6.75 mm Phillips #00 screw from the center of the battery.

Step 4

- Remove the pieces of tape securing the bluetooth/wifi antenna.

This document was generated on 2019-12-28 08:17:53 AM (MST).

Step 5

- Grip the base of the connector with your fingers or pliers, and gently pull the connector straight back towards you to remove it.

⚠ If possible try not to pull the connector out by the wires, as this can damage the connector.

Step 6

- Carefully remove the battery from the laptop.

⚠️ Take care not to pull out the Bluetooth antenna while removing the battery.

Step 7 — Hard Drive

- Remove four 3.3 mm Phillips #00 screws securing the hard drive to the panel.

This document was generated on 2019-12-28 08:17:53 AM (MST).

Step 8

- Lift the hard drive up and turn it over and remove the connection.

To reassemble your device, follow these instructions in reverse order.
