INTRODUCTION

This guide will explain how to safely remove the screen from your Lenovo Yoga 2 13" laptop. It will provide a list of the tools needed as well as the easiest way to remove the screen without damaging it.

TOOLS:

- Jimmy (1)
- Flathead 3/32" or 2.5 mm Screwdriver (1)
- Small Phillips Screwdriver (1)
- iFixit Opening Picks set of 6 (1)

PARTS:

- Lenovo Yoga 2 13" LCD Back Cover (1)

Step 1 — Screen
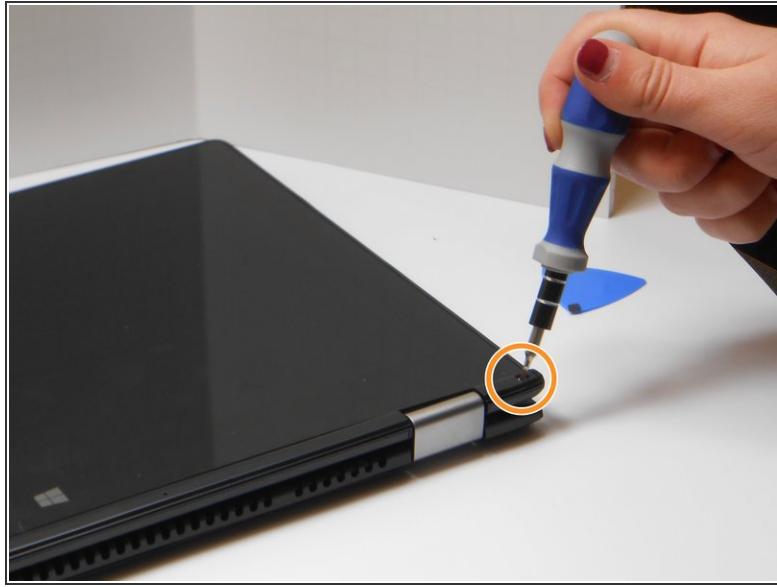

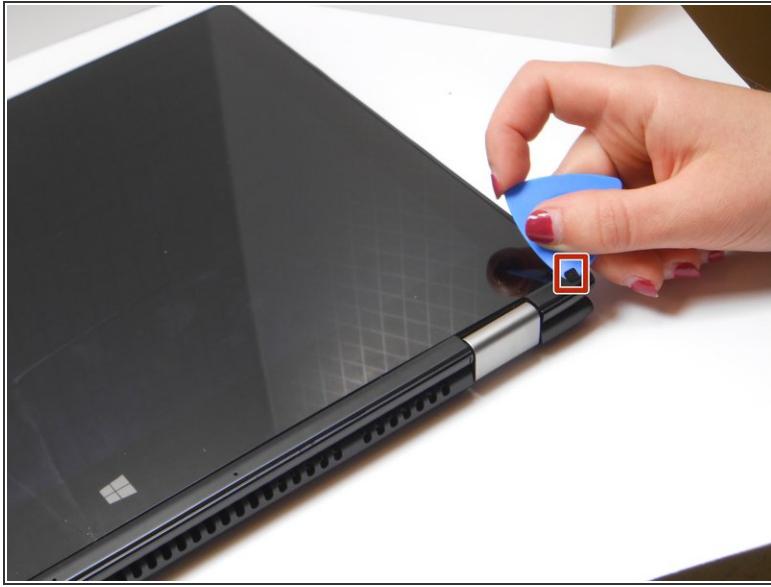

- Using an opening pick, remove one small black rectangle piece on each of the hinge corners to locate screws.

- Using a Phillips head screwdriver, carefully remove one 4.8 mm screw from each corner.

Step 2

- Using the Jimmy, remove the long centerpiece covering between the hinges.

Step 3
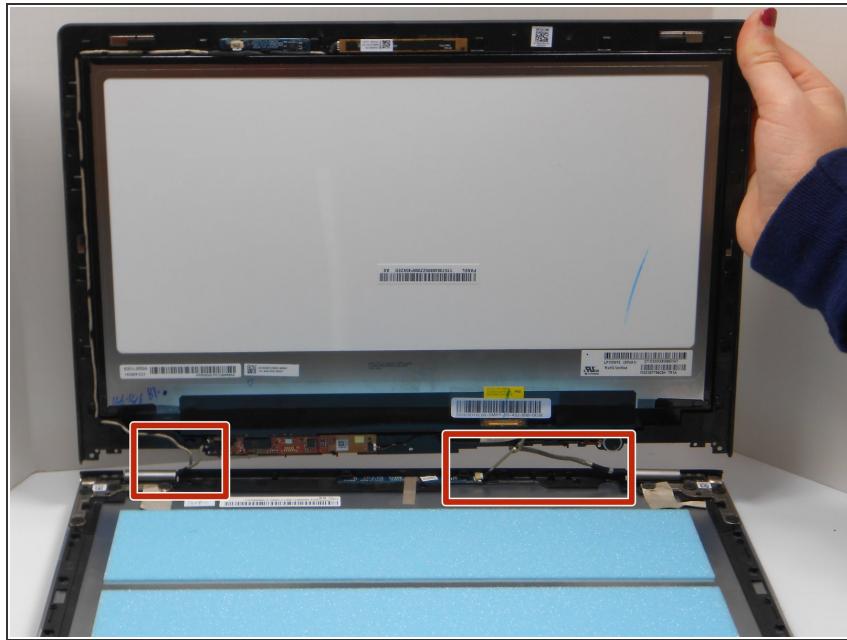

● Detach the screen from the front panel by sliding the screen up about 2mm. Do not pull too far, as there are still connected wires.

Step 4
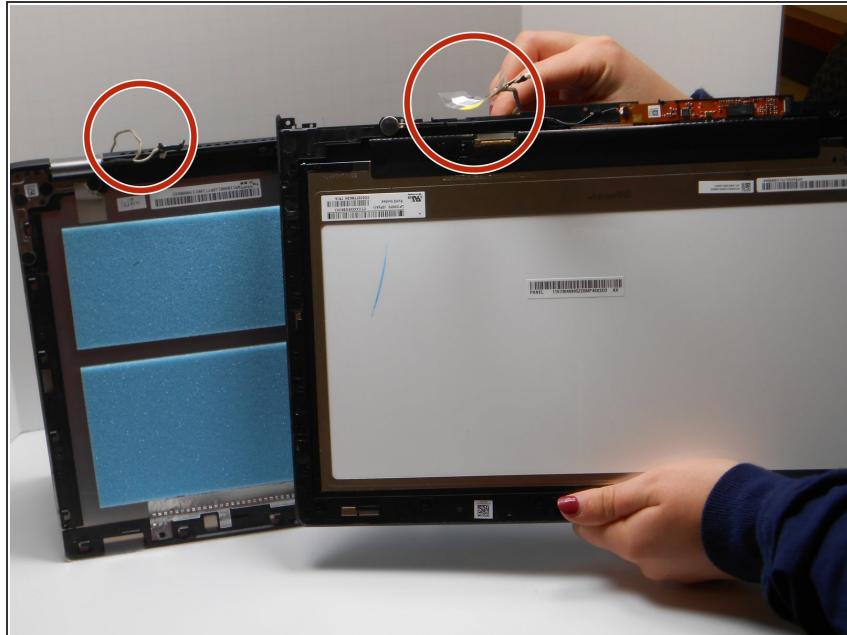

● Locate the gold wire and follow it to two clips. Remove the clips and the clear tape securing the wire.

● Gently unsnap the wire from the hooks along the perimeter, and remove any tape along the wire.

Step 5

- Completely separate the screen from the laptop.

  - During reassembly, remember to set the screen about 2 mm beyond the lid top edge. Then, slide down to engage the hinges.

To reassemble your device, follow these instructions in reverse order.
