

Lenovo Yoga 710-14IKB RAM Replacement

Show the user how to replace or upgrade the ram.

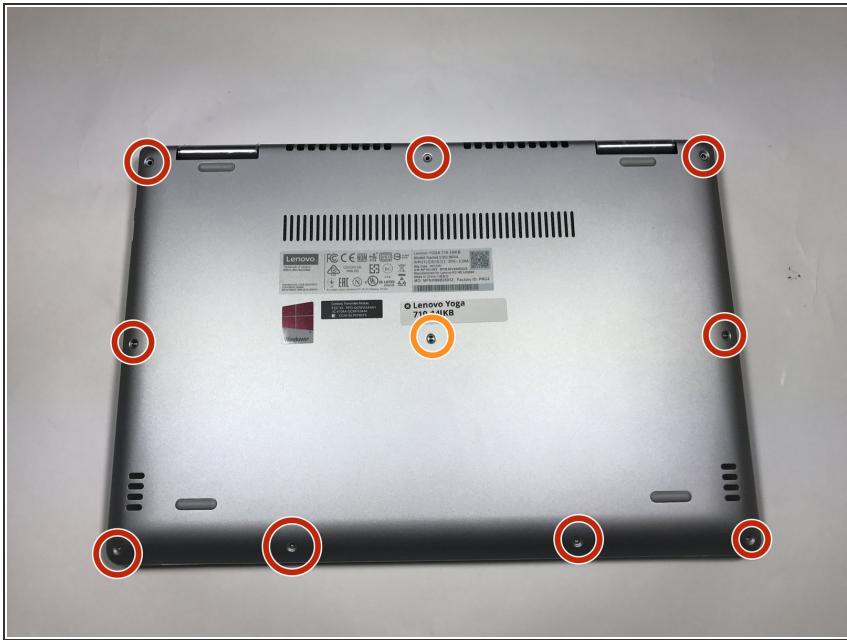

Written By: Grant Doerksen

 **TOOLS:**

- [T4 Torx Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)

Step 1 — Back Cover

! Ensure your device is completely OFF before starting this guide.

- Use a Torx T4 screwdriver to unscrew the nine 5 mm screws holding the cover in place.

- Use a Torx T4 screwdriver to unscrew the 8 mm screw in the center.

! When, reassembling, make sure not to tighten the screws too much or you may risk cracking the plastic cover.

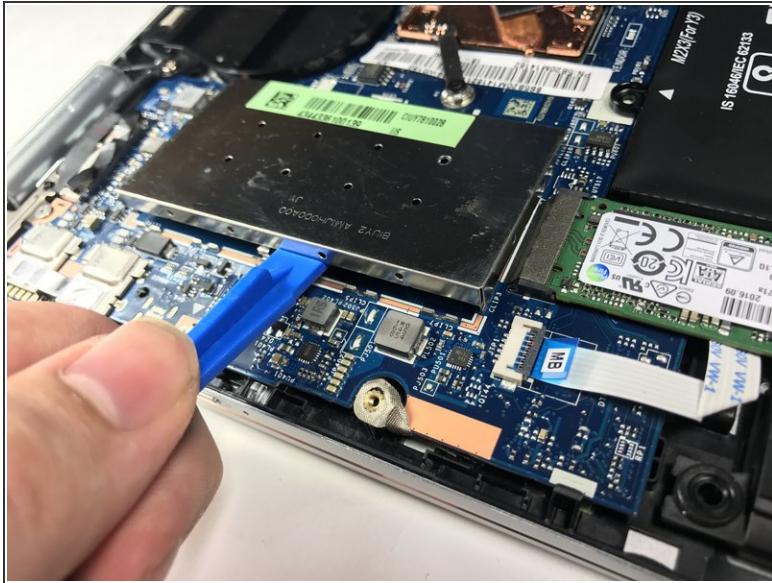

Step 2

- Use the plastic opening tool to pry the cover up and away from the laptop, starting at one end and working your way around the cover.

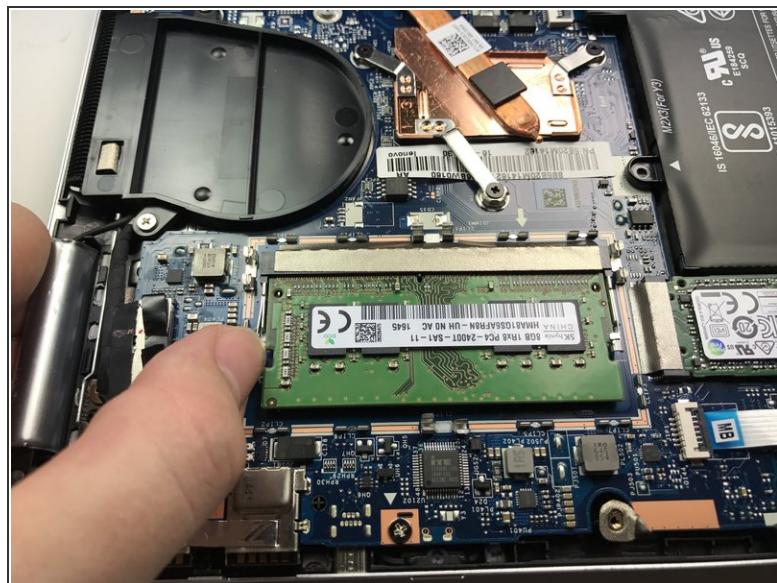

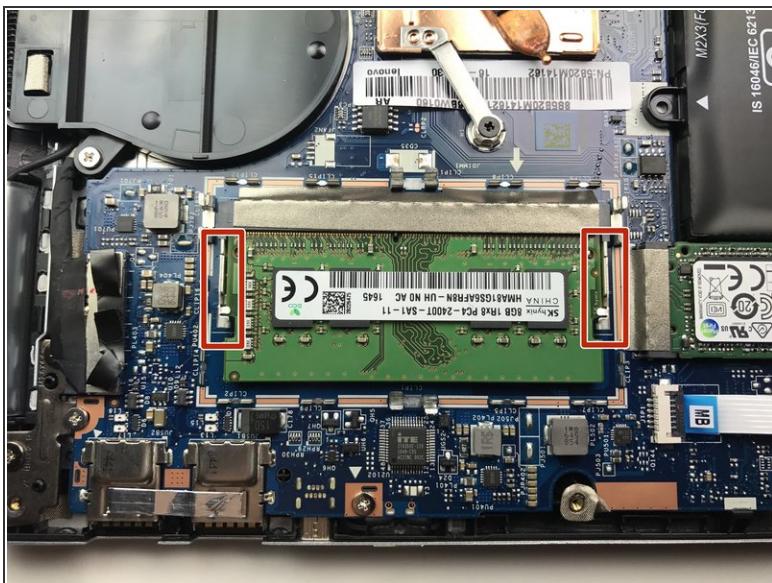

i The cover is large and flat and made of thin plastic. It cracks easily, so make sure not to pry too hard.

Step 3 — RAM

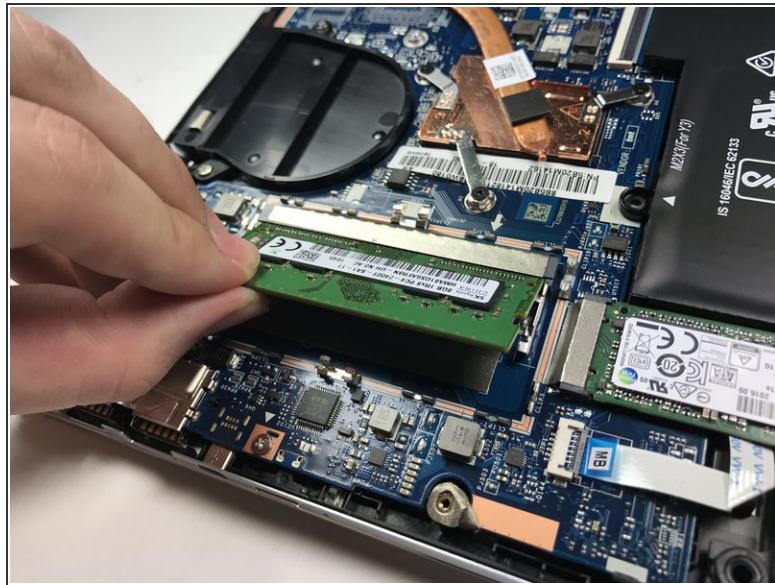

- Use blue plastic opening tool to pry the ram cover loose. Carefully lift up the ram cover and remove it from the laptop.

Step 4

- Locate the ram hold downs.
- Push outwards on the hold downs to release the RAM.

Step 5

- Remove the RAM by pulling away from the RAM socket.

To reassemble your device, follow these instructions in reverse order.
