INTRODUCTION

Use this guide as a reference when removing the back case on the Lenovo Yoga 730-13IKB laptop *(models beginning with "81CT").*

Removing the back case exposes the laptop's internals and is a prerequisite step for replacing or repairing most components. Always power off the laptop before working on any internal components.

⚲ TOOLS:

- iFixit Opening Tools (1)
- T5 Torx Screwdriver (1)

Step 1 — Back Case

- (i) Power off the laptop and place it facedown on a non-scratching surface.

- ● Remove the nine T5 screws fastening the back case.

Step 2
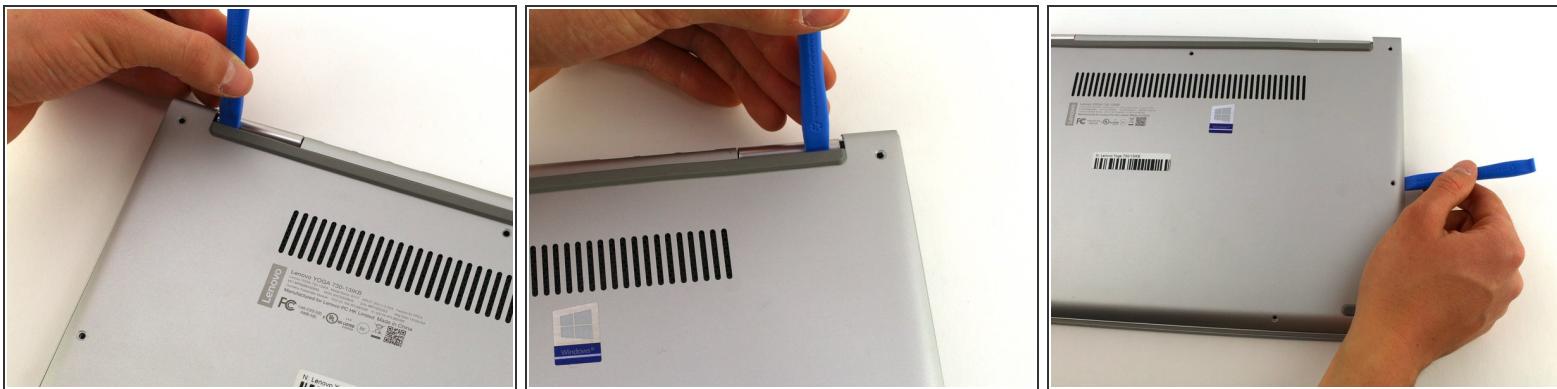

- ● Slide a plastic opening tool underneath the back case near the screen hinges. Gently pry up on either side.

- ● Slide the opening tool underneath the back case next to the middle screw hole at either side of the case. Gently pry up.

- (i) You may hear popping sounds as the tabs securing the case release. This is normal. If the case does not move, try prying at a different angle/position.

Step 3

- Remove the back case by pulling up near the screen hinges and lifting diagonally away from the laptop.

- ⓘ Go slowly to avoid breaking any connecting tabs.

To reassemble your device, follow these instructions in reverse order.
