

# Lenovo Yoga 920-13IKB Fingerprint Sensor Replacement

How to replace the fingerprint sensor on the Lenovo Yoga 920-13IKB.

Written By: Alyssa McCulloch

## INTRODUCTION

This guide shows how to replace the fingerprint sensor on the Lenovo Yoga 920-13IKB.

### TOOLS:

- [iFixit Opening Tools](#) (1)
- [T5 Torx Screwdriver](#) (1)
- [Phillips #00 Screwdriver](#) (1)

## Step 1 — Back Cover

*(i)* Flip the device over to access the screws on the back cover.

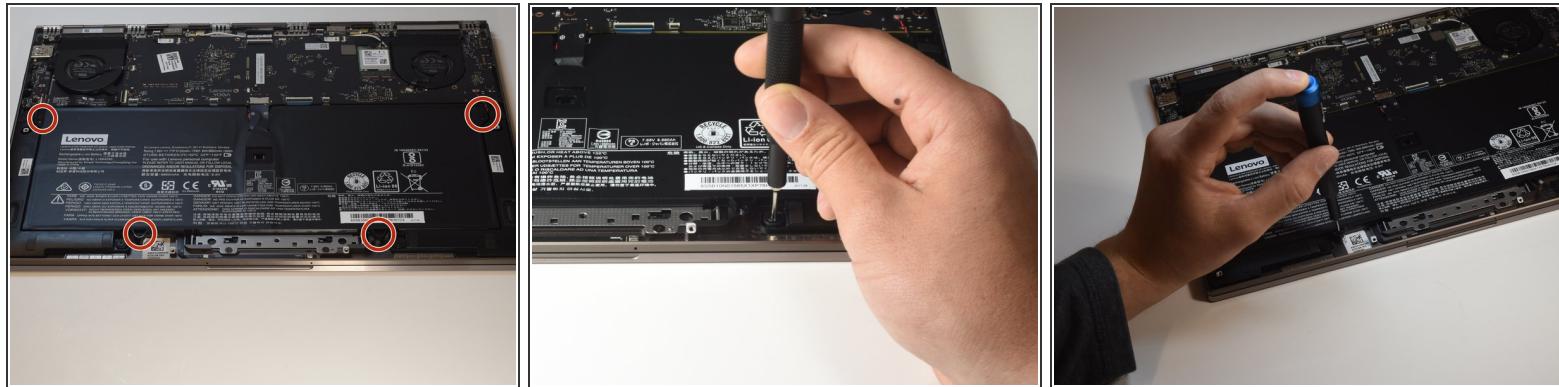

- Remove the ten 5mm Torx T5 screws on the back cover to loosen the back cover.

## Step 2

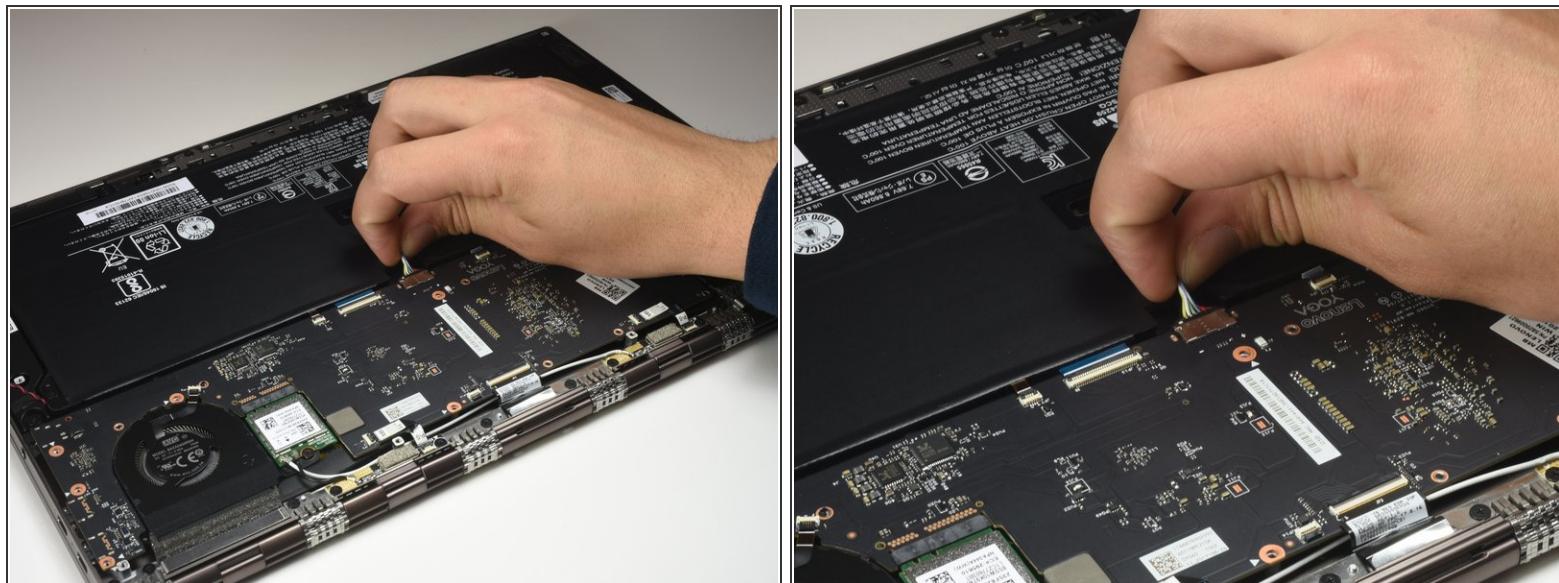

- Slide the iFixit Opening Tool under the back cover to lift it up.
- Pull up on the cover with your hand to release the tab holding the center of the cover in place.

## Step 3 — Battery

- Remove the four 5mm Phillips #00 screws that hold the battery in place.

## Step 4

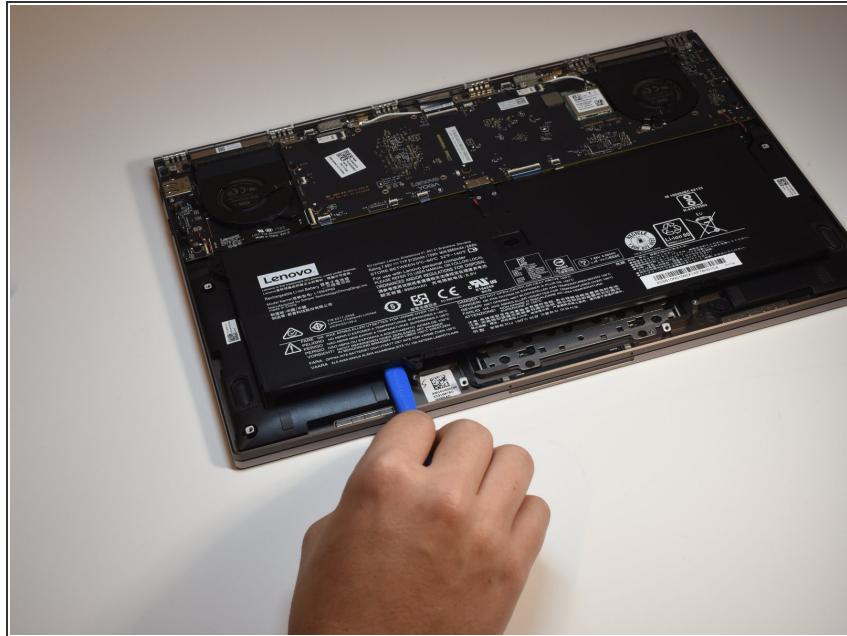

- Grab the grouping of wires with your fingers close to the connector and gently pull to disconnect the battery from the motherboard.

*(i)* The wire grouping is located underneath the thin flap near the center of the battery.

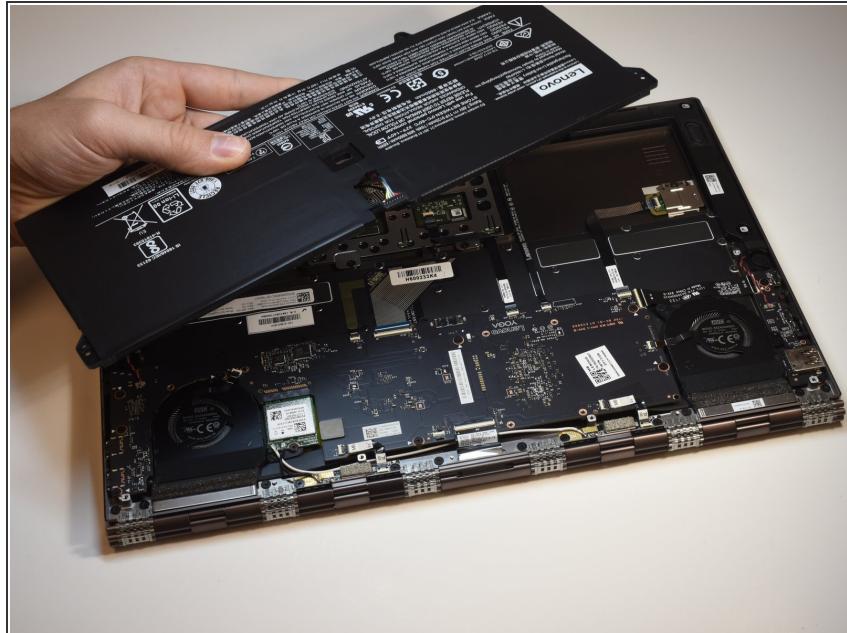

**!** Do not lift the battery out before disconnection from the motherboard to prevent shortages or damage.

## Step 5

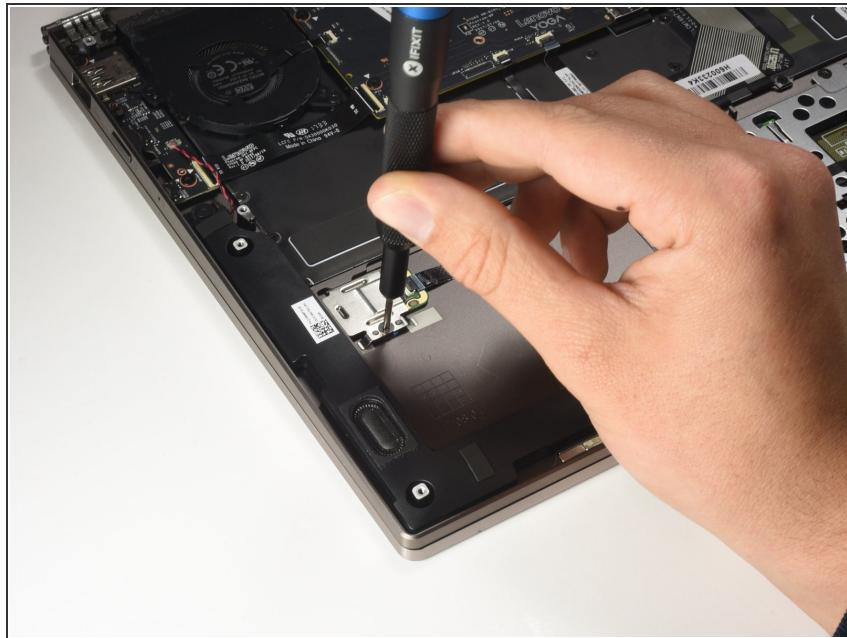

- Use the iFixit Opening Tool to lift the battery up enough to grab it with your hands.

## Step 6

- Remove the battery.

## Step 7 — Fingerprint Sensor

- Remove the 3mm Phillips #00 Screw to loosen the sensor.

## Step 8

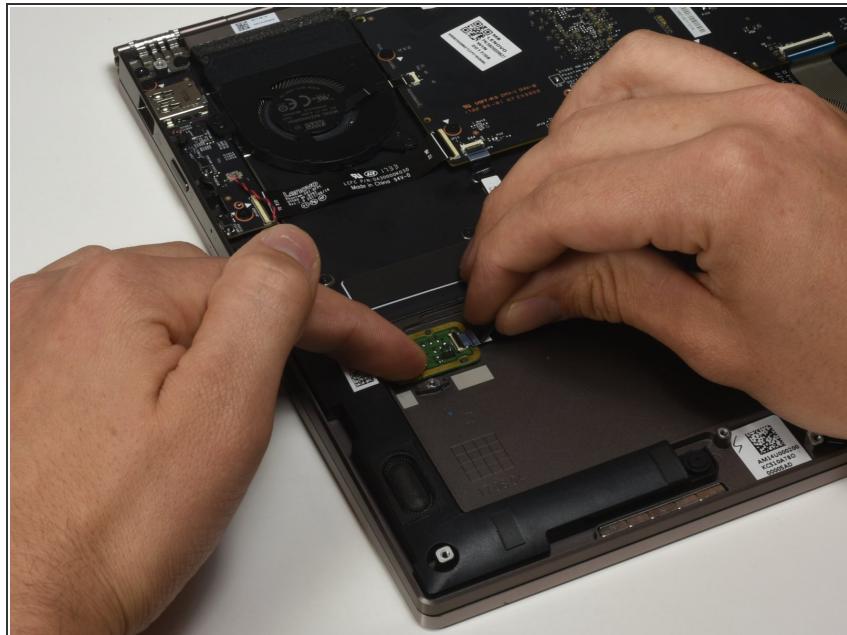

- Lift up the cover on the fingerprint sensor using the iFixit Opening Tool and remove the cover from the sensor.

## Step 9

- Flip up the cable connector tab using the iFixit Opening Tool to release the ribbon wire.

## Step 10

- Unplug the ribbon wire from the sensor to completely free the sensor.

## Step 11

- Lift the fingerprint sensor with the iFixit Opening Tool and remove it from the device.

To reassemble your device, follow these instructions in reverse order.
