

Lexibook Junior Tablet Charging Port Replacement

This guide removes the charging port and will help restore power to your tablet if it will not charge.

Written By: Rachel Klesius

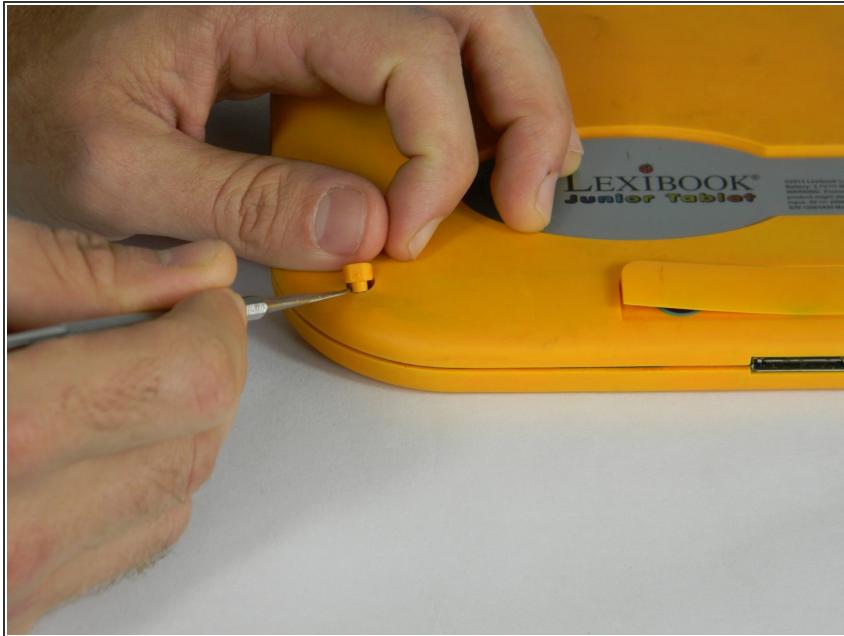

INTRODUCTION

This guide requires soldering skills and the removal of both the battery and the motherboard. This is one of the harder guides.

TOOLS:

- [Metal Spudger \(1\)](#)
- [Spudger \(1\)](#)
- [Phillips #00 Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)
- [Soldering Iron \(1\)](#)

Step 1 — Battery

⚠ Make sure your device is powered off before replacement to prevent electric shock.

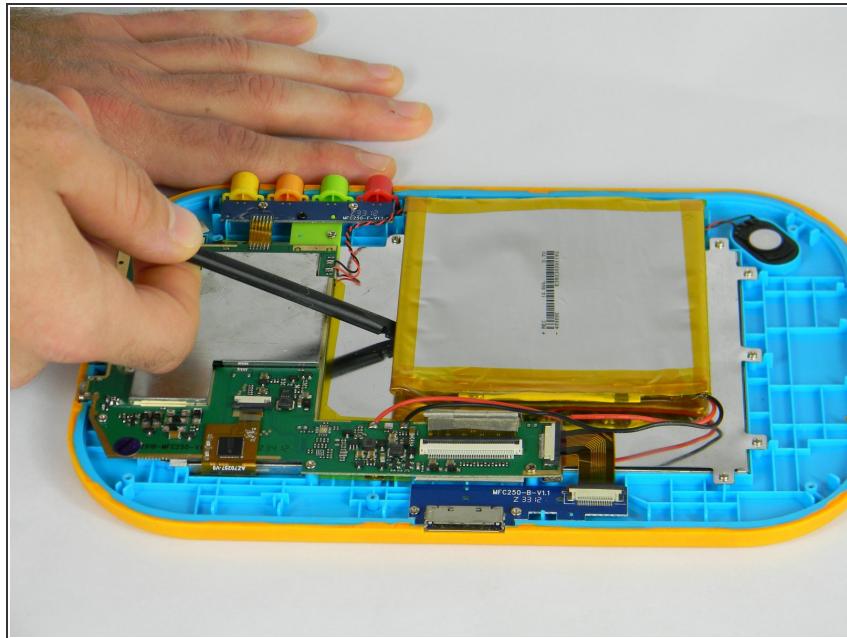

- With the device screen face down, use the metal spudger to remove the small rubber circles on all four corners of the device. The screws should now be revealed.
- Using the metal spudger, pry open the small, long rubber rectangle on the back of the device to reveal more screws.

Step 2

- Using a Phillips #00 screwdriver, remove the four 6.8mm screws from the four corners of the device.
- Using the same screwdriver, remove the three screws that were behind the rubber rectangle. These screws do not come out of the device.
- Use the plastic opening tool to gently pry open the back panel of the tablet.

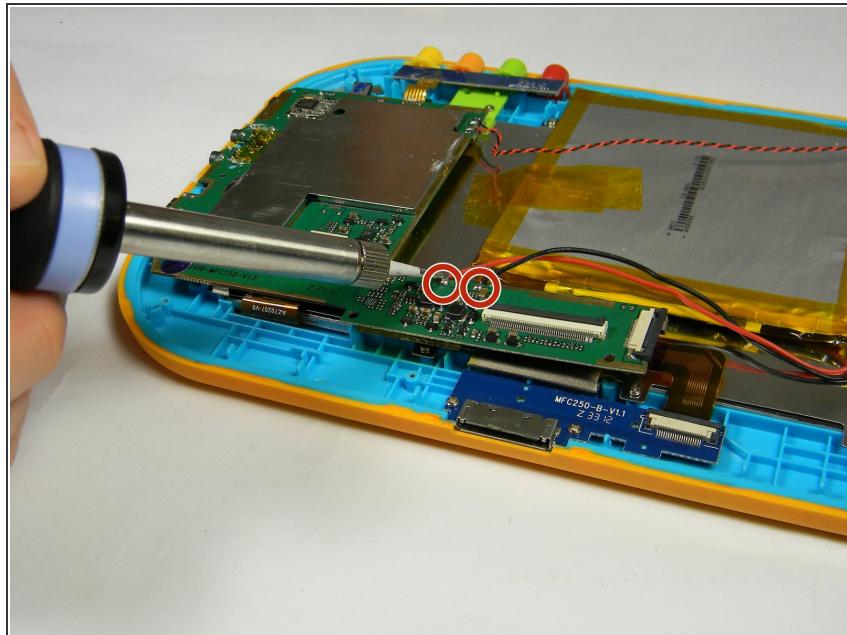

Step 3

- Use the nylon spudger to gently pry under the battery to remove it.

⚠ Make sure you do not damage the battery or metal plate in this process and only use a nylon spudger. Be patient and work slowly for the best results.

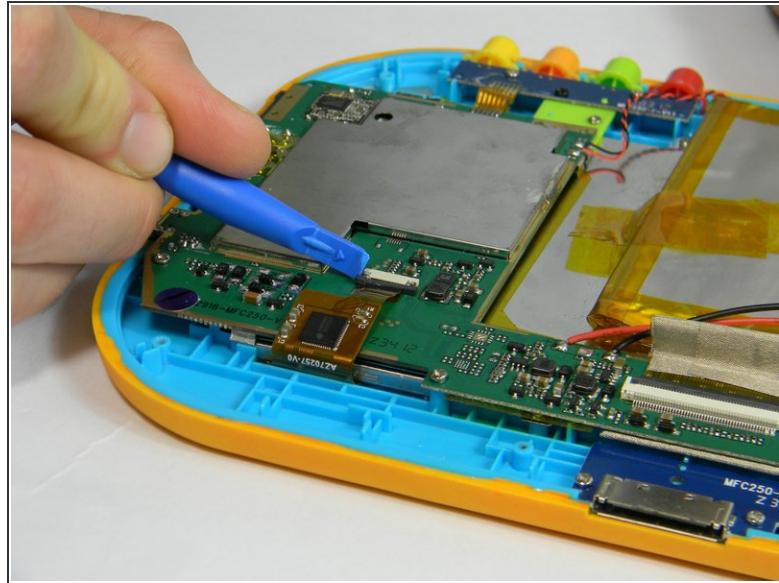

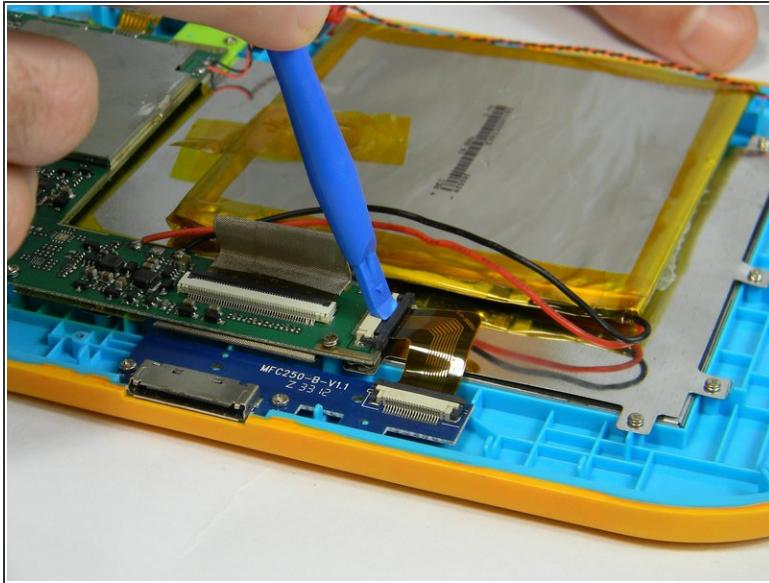

Step 4

- Use a soldering iron to remove the battery from the motherboard safely.

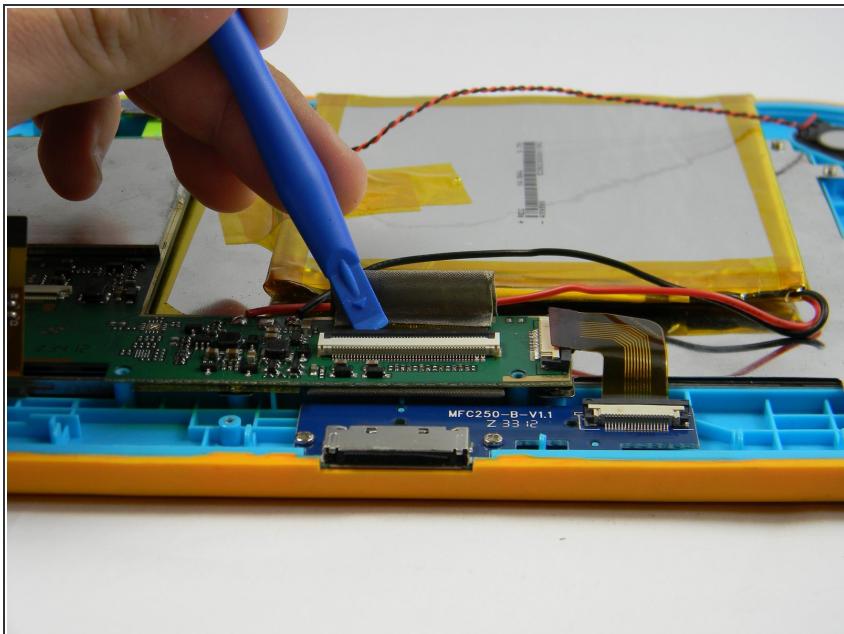

i For advice on how to solder, check out [iFixit's Soldering Guide](#).

Step 5 — Motherboard

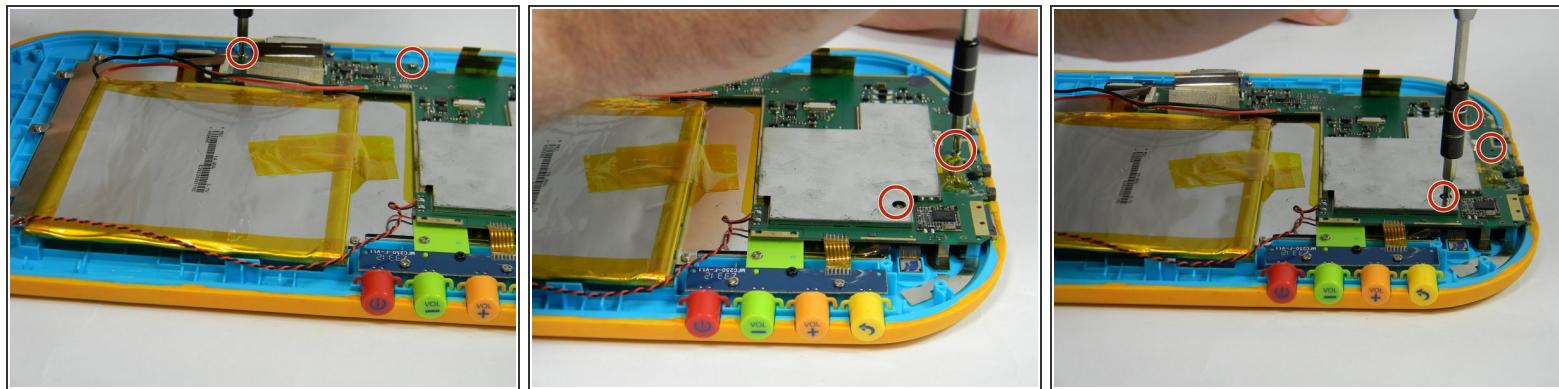

- Using the plastic opening tool, gently push the two small, black and white switches out in the direction of the ribbon wires.
- Slowly pull the ribbon wire out of the switch to free it.

Step 6

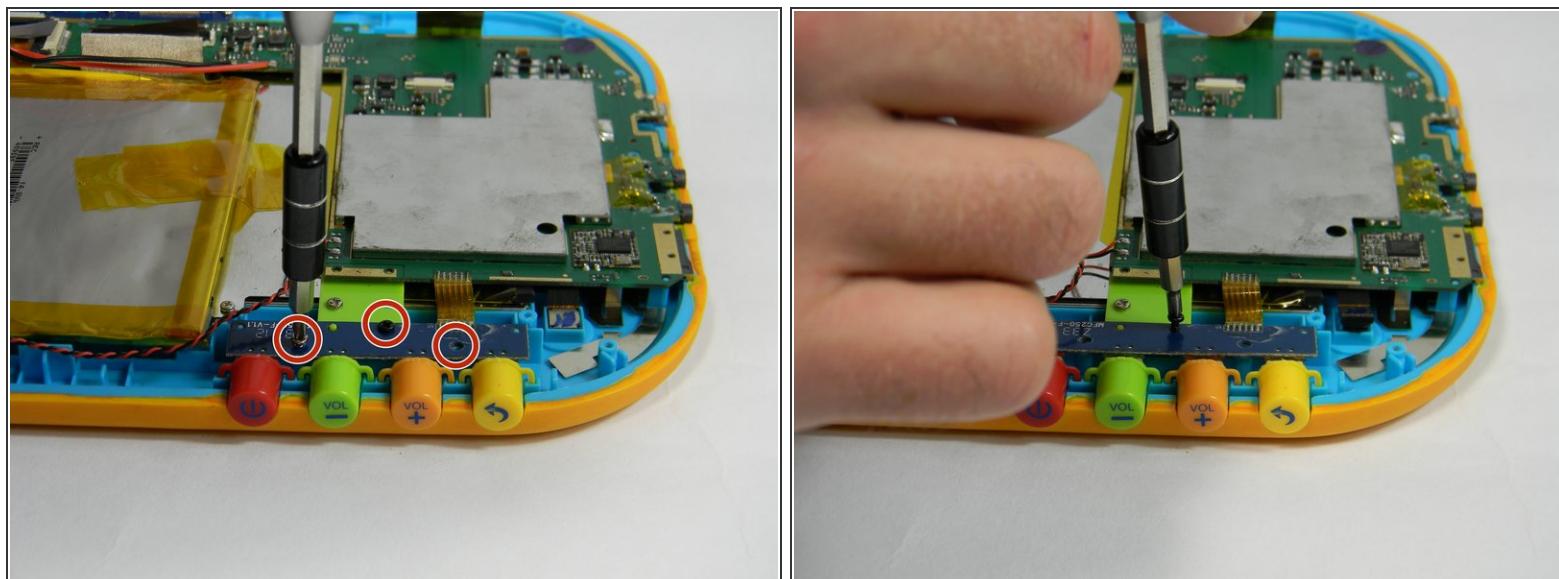

- Push the larger black and white strip leading to a ribbon wire upward using the plastic opening tool.
- Carefully pull the ribbon wire out of the switch

Step 7

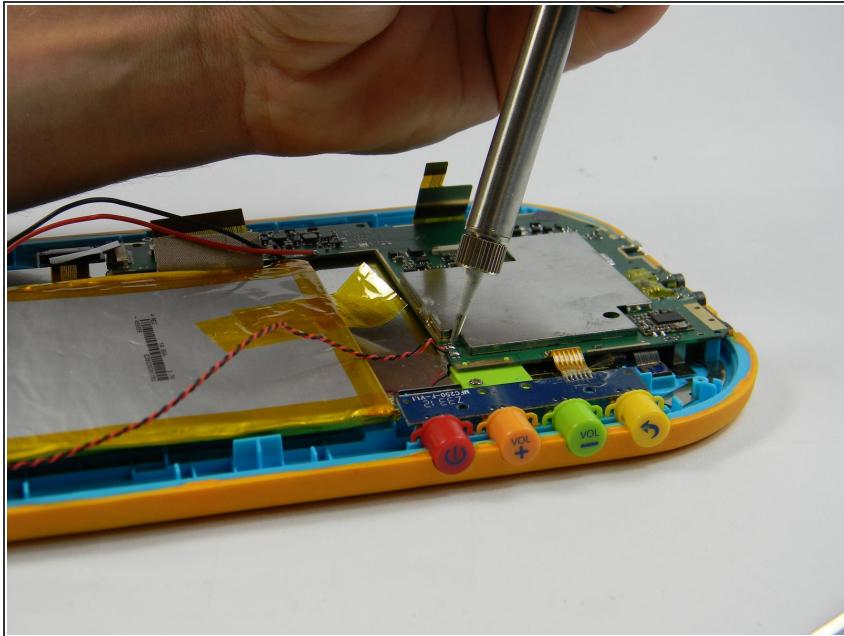

- Unscrew the five 4 mm screws around the perimeter of the motherboard using the ph00 size phillips head screwdriver.

Step 8

- Remove the button board by unscrewing two more 4 mm screws and one 6.5 mm screw

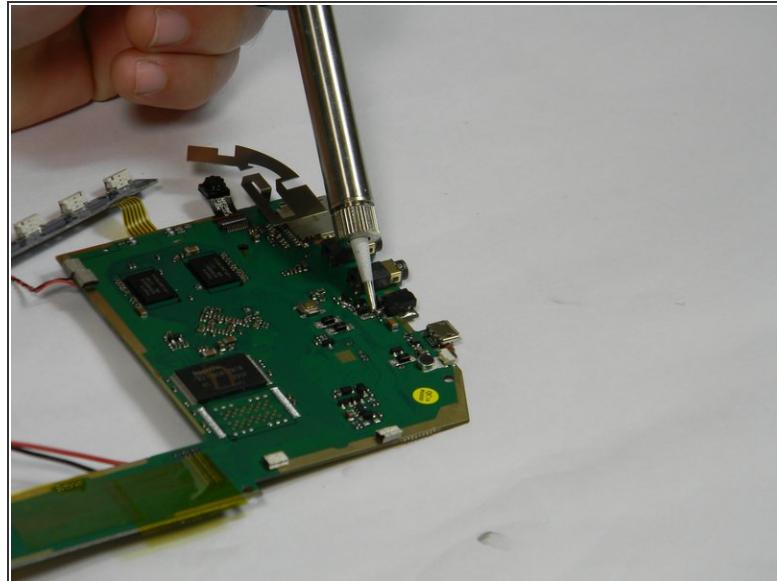

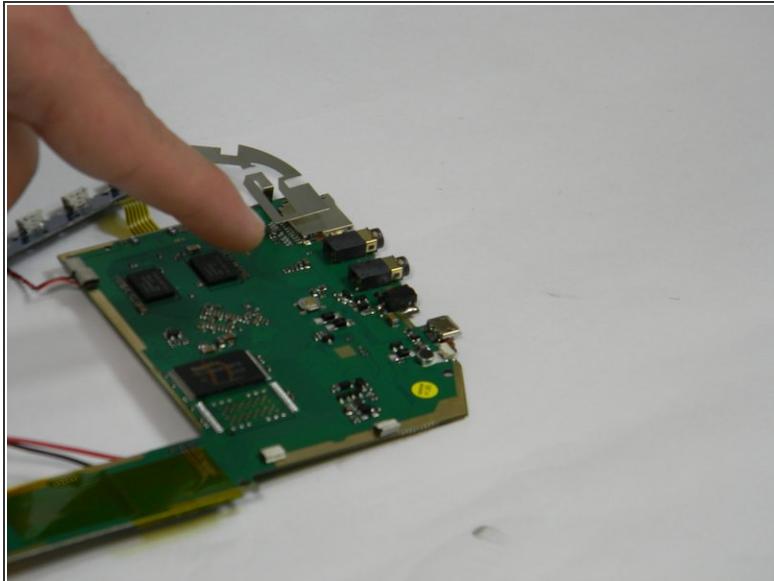

Step 9

- Solder off connections from the wire connecting the motherboard to the speaker.

i For how to solder, check out [iFixit's Soldering Guide](#).

Step 10 — Charging Port

- Solder off the connections to the charging port.

i For how to solder, check out [iFixit's Soldering Guide](#)

To reassemble your device, follow these instructions in reverse order.
