

# Lite-On iHAS324 Disc Tray Replacement

This guide will show how to replace the disc tray of a Lite-On iHAS324 device. Reasons to replace the disc tray include: the disc tray is not ejecting, is not ejecting smoothly, or is not ejecting at all.

Written By: Kayla Culpepper

 **TOOLS:**

- [Paper Clip \(1\)](#)
- [Phillips #2 Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)

## Step 1 — Chassis

- Insert a paper clip into a small hole on the right side of the faceplate bellow the disc tray.
  - There may be resistance, do not be afraid to use force.
- The tray should then pop open.
- Pull out the tray so that it is fully extended.

## Step 2

- Use a plastic opening tool to push the three tabs located on the right, left, and bottom side of the outer chassis to loosen the faceplate off.

## Step 3

- Pull the faceplate off the chassis.

**⚠** Do NOT pull the faceplate all the way off the disc tray, because doing so can cause damage to the faceplate.

**ⓘ** There may be resistance, do not be afraid to use force.

## Step 4

- Using the Phillips Head #2 screwdriver, unscrew the two 8.5 mm screws located on the bottom back of the chassis.

## Step 5

- Remove the bottom plate by lifting it off the device.

## Step 6

- Turn the device over.
- Remove the top plate by pulling the sides and lifting the plate off.

## Step 7 — Disc Tray

- Push the left tab in and slide the tray out on the left side.
- Pull the gray plastic casing on the right side away from the tray.
- Slide the right side of the tray out.

To reassemble your device, follow these instructions in reverse order.
