

# Logitech G502 Proteus Core Weight Replacement

A guide to replacing and adjusting the weights within the device.

Written By: Sage Farray

## INTRODUCTION

The Logitech G502 Proteus Core is a tunable device. Follow this guide to learn how to utilize the included weights.

## Step 1 — Weights

- Remove the bottom panel of the device.

## Step 2

- Remove or add the desired number of weights to the fitted holes in the base of the mouse.

### Step 3

- Close the cover once the desired weights are set in place.

### Step 4

- Repeat steps 1 through 3 until you reach the most comfortable weight for your daily use.

To reassemble your device, follow these instructions in reverse order.
