INTRODUCTION

This guide shows you how to begin the disassembly of the Logitech Harmony 650 Universal Remote. It is recommended that you have the iFixit ProTech Toolkit.

🔧 TOOLS:

- Pro Tech Toolkit (1)
- Phillips #000 Screwdriver (1)
- Heavy-Duty Spudger (1)
- iFixit Opening Tools (1)

Step 1 — Case

- Remove the battery cover by applying pressure to the indented area and pushing the cover toward the rear of the device.

Step 2

- Remove the batteries using the silver pull tab.

Step 3

- Using a J000 Philips head screwdriver remove the four 5mm screws around the rim of the battery chamber.

Step 4

- Remove the small plastic cover beneath the plastic LED housing by using a 3.0 flathead screwdriver and a spudger to pry it off. It is glued to the case. If you are having trouble removing it try applying some heat to loosen the glue.
Step 5

- Remove the two 5mm screws located underneath the cover using a J000 Philips screwdriver bit.

Step 6

- Using a plastic opening tool, pry the case off starting from the top of the device (nearest the transmitter). There are 3 tabs along the side of the case and one at the back.

- The top led protector plastic cover will also be freed once back is removed.
