

# Logitech Harmony Smart Keyboard On/Off Switch Replacement

This will instruct you to remove and replace the On/Off Switch for the Logitech Harmony Smart Keyboard.

Written By: Hayley Nichols

## INTRODUCTION

This is a replacement guide for the on/off switch on the Logitech Harmony Smart Keyboard.

The on/off switch, or power switch, powers the keyboard on and off. The on/off switch appears green when powered on, and appears red when powered off.

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
- [Spudger](#) (1)

## Step 1 — Back Panel

- Turn keyboard over to the backside.

## Step 2

- Press and slide up on the upper battery latch, using both thumbs.

## Step 3

- Remove the two AA batteries and set them aside.

## Step 4

- Unscrew all five 4.0 mm screws, using Phillips #1 screwdriver.

## Step 5

- Peel off the center sticker to reveal two hidden 4.0 mm screws.
- Unscrew these two screws with a Phillips #1 screwdriver.

## Step 6

- Lift both top left and top right rubber stickers halfway, using the sharp end of the plastic spudger.
- Unscrew a total of two 4.0 mm screws, under the rubber stickers, using a Phillips #1 screwdriver.

## Step 7

- Unscrew the top center 4.0 mm screw, in the battery compartment, using the Phillips #1 screwdriver.

*(i)* Now, you should have a total of ten 4.0 mm screws set aside.

## Step 8

- Wedge the flat end of the spudger between the back panel and front panel.
- Slide the flat end of the spudger from right to left to pry the two panels apart.

## Step 9

- Separate the back panel from the front panel completely, using both hands.
- ⓘ A white ribbon flex cable will remain connected to both panels.
- ⚠ Pull the panels apart slowly and gently, or the white ribbon flex cable may be unsafely removed.

## Step 10 — On/Off Switch

- Grip the lower end of the ribbon flex cable (white band) using your thumb and index finger.
- Then slide the strip out toward yourself in a scooping motion.
- ⓘ Now, you should have two completely separated panel pieces.

## Step 11

- Set aside the front panel and locate the green card atop the on/off switch on the back panel.
- Unscrew the two 4.0 mm screws on either side of the green card using a Phillips #1 screwdriver.

## Step 12

- Lift up and hold the left side of the green card with one index finger.
- Grip and pull the on/off switch out with your other index finger and thumb.

To reassemble your device, follow these instructions in reverse order.
