# Logitech MBJ58 Mouse Buttons Replacement
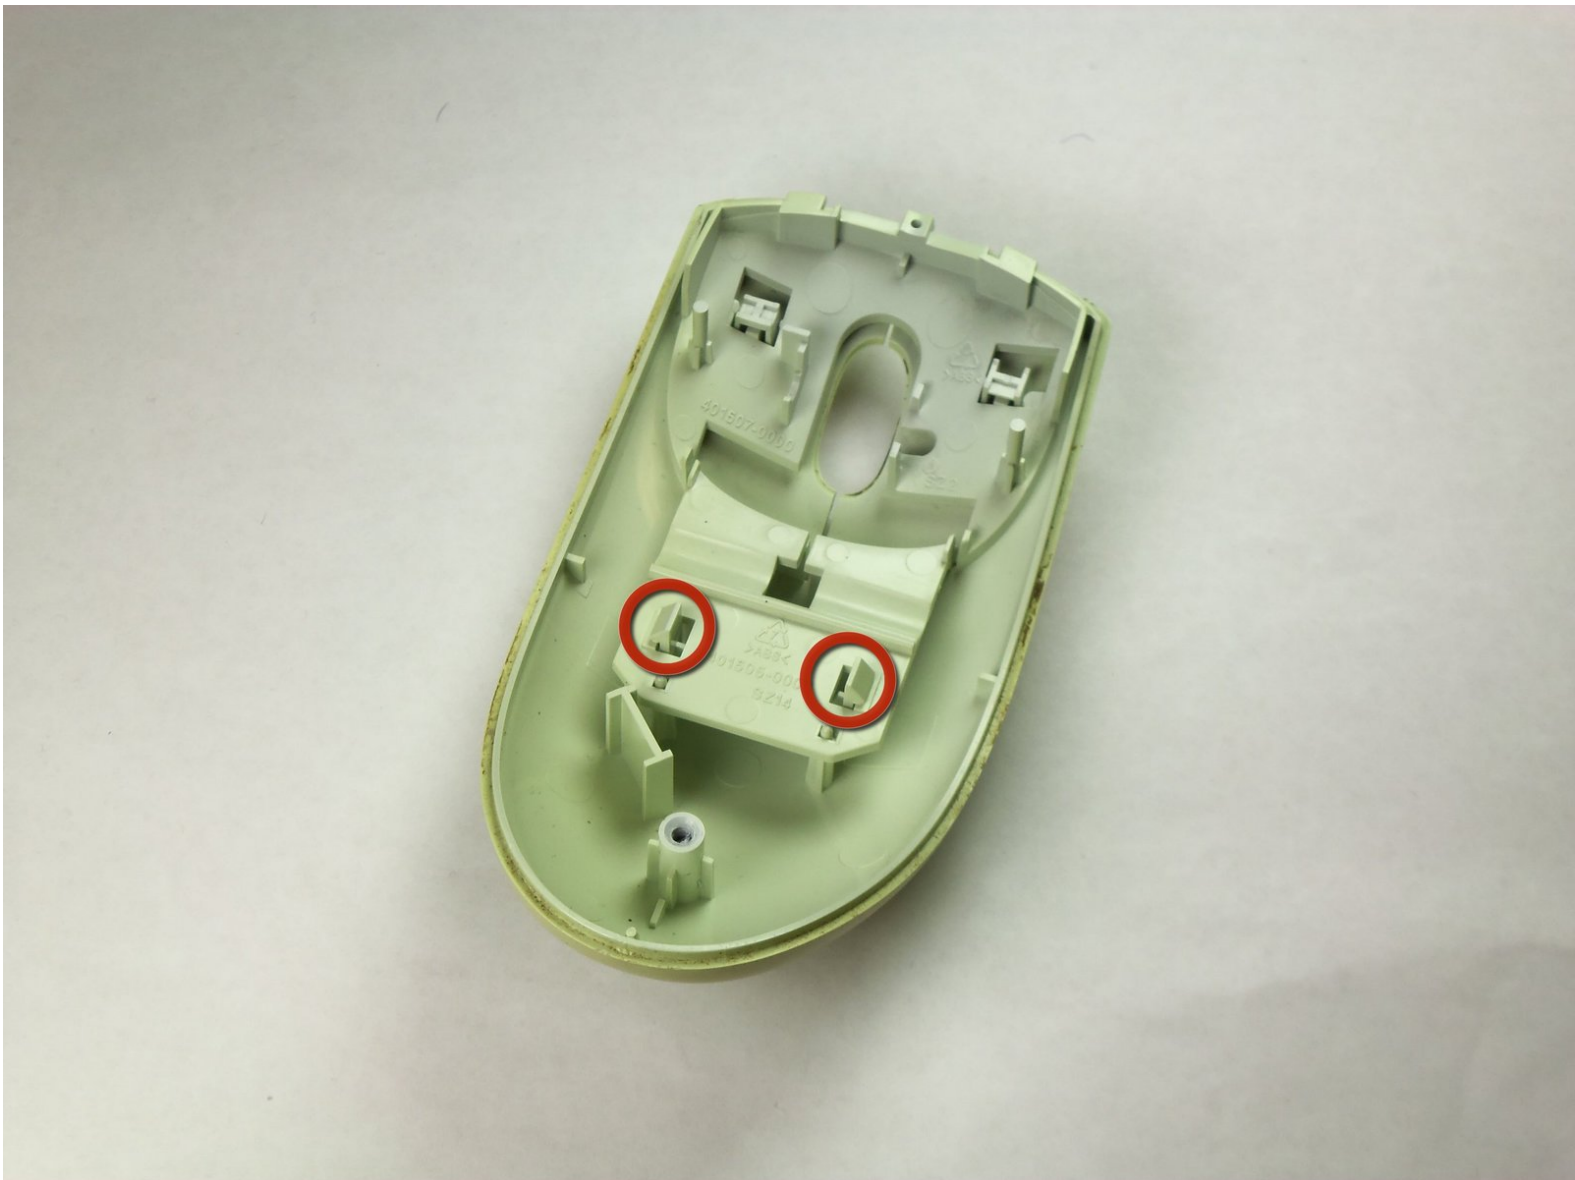

You will disassemble the mouse top cover and replace the mouse buttons.

Written By: Maximilian Betkowski

## INTRODUCTION

After removing the top cover you will be able to replace the mouse buttons.

### 🔧 TOOLS:

- Phillips #1 Screwdriver (1)

## Step 1 — Top cover

- Hold the mouse so that the bottom is facing up.

- Remove the Phillips #1 screw from the bottom half of the mouse.

## Step 2

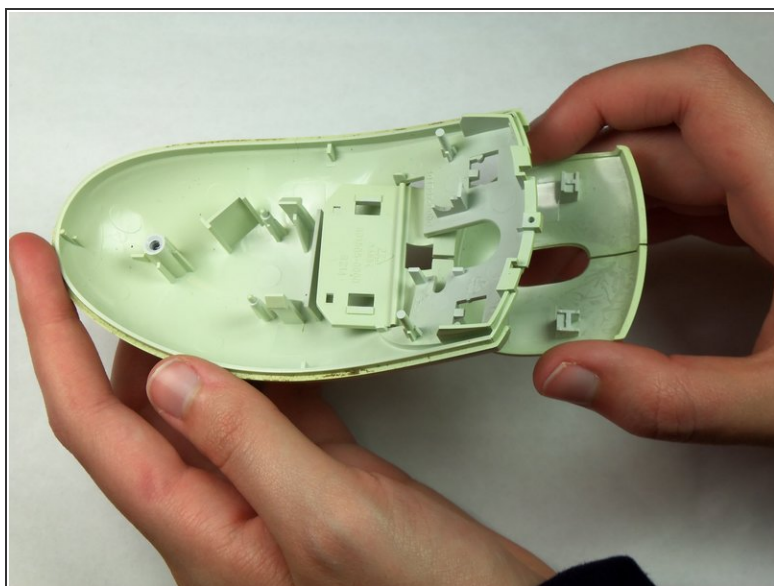

- Place the mouse so that the bottom is resting against a hard surface.

- Gently lift the top cover of the mouse and remove it.

## Step 3 — Buttons

- Locate the two tabs that are protruding from the button assembly.

⚠ Be careful not to break either of the two tabs by squeezing too hard.

- Now pinch the tabs together to free the buttons.

## Step 4

- Free the button assembly from the top cover by bringing the button section down.

- Then sliding the button assembly out from the top cover through the opening.

- (i) When fully parted the top cover and the button assembly should look like this.

---

To reassemble your device, follow these instructions in reverse order.
