Logitech Webcam Pro 9000 Microphone Replacement

In case you are having problems with your microphone, please refer to this guide for assistance.

Written By: nieko

INTRODUCTION

There are two parts to the microphone: the cover and the microphone and its casing. It takes about the same amount of time to remove the cover and the microphone.
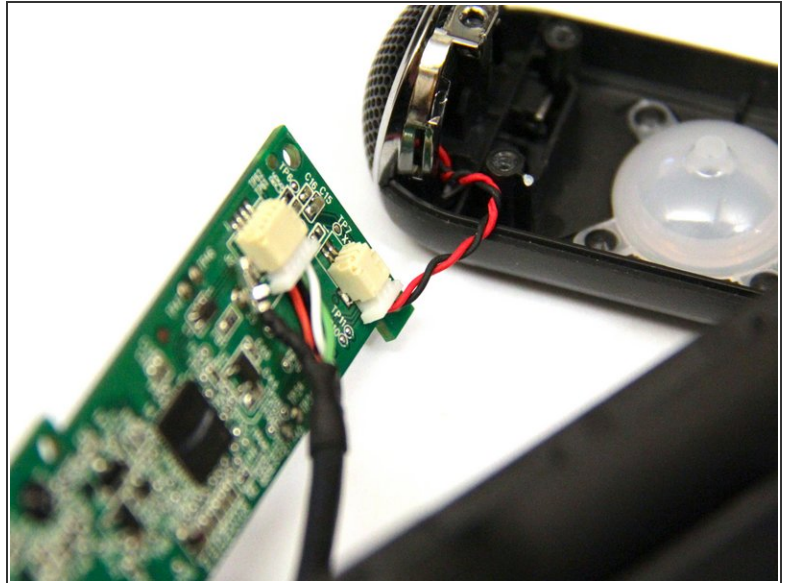

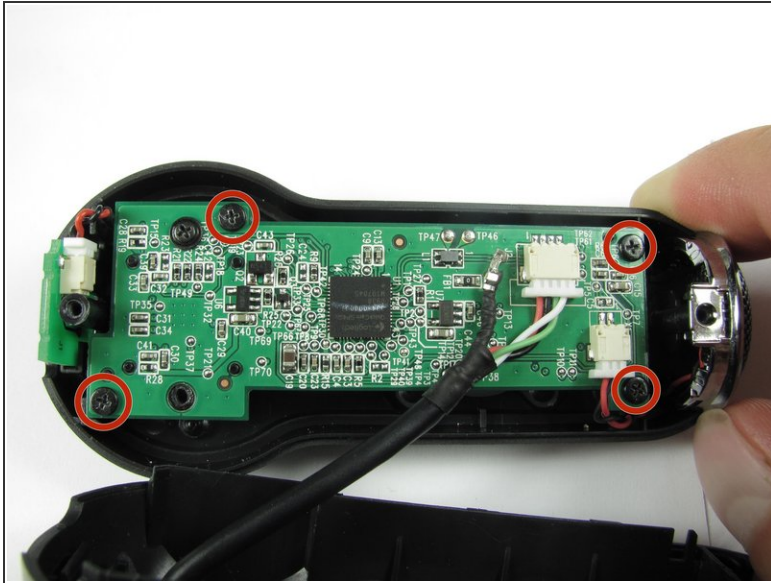

⚒ TOOLS:

- iFixit Opening Tools (1)
- Phillips #0 Screwdriver (1)

This document was generated on 2019-10-08 05:22:13 AM (MST).

Step 1 — Front and Back Cover

- Remove the two 8 mm Phillips #0 screws on the back cover.

⚠ The motherboard is attaching the two covers together, so don't separate them entirely just yet.

ⓘ There is a button that loosens as the Phillips screws are removed. Don't be alarmed if it falls out.

Step 2

- Remove the four 6mm Phillips#0 screws connecting the motherboard and front cover.

⚠️ **DO NOT** detach the wire connecting the motherboard to the front cover.
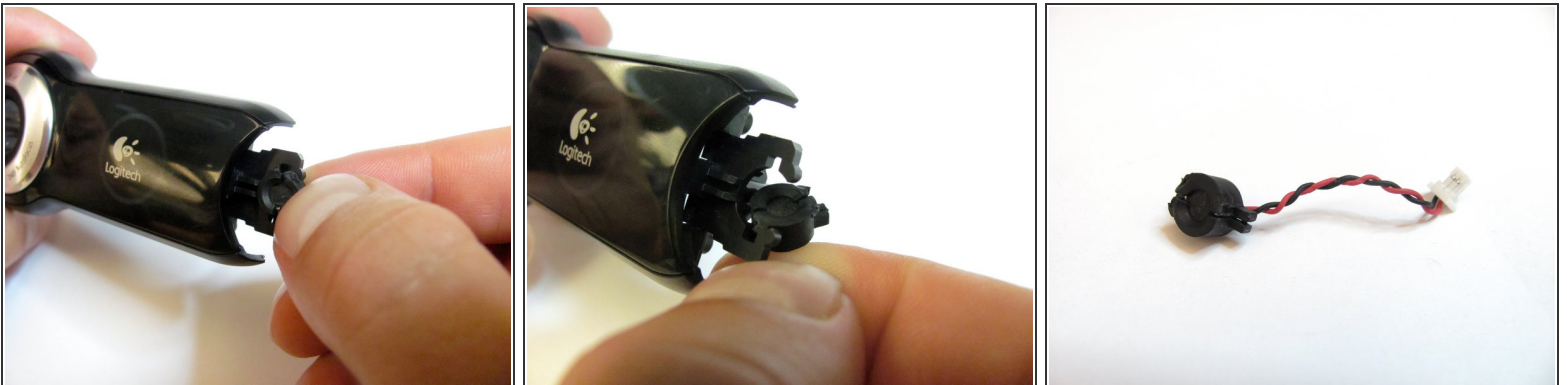

Step 3 — Microphone Connection

- Grasp the white wire connector between the tabs and the socket.

- Wiggle the connector back and forth to remove the front cover from the motherboard.

This document was generated on 2019-10-08 05:22:13 AM (MST).

Step 4 — Microphone

- Wedge the plastic opening tool into the crack between the plastic cover and microphone guard.

- Use the wedge to separate the two pieces.

- (i) It might take more force than expected.

Step 5

- Twist the rubber casing and remove it from the plastic cover.

To reassemble your device, follow these instructions in reverse order.
