Step 1 — Front and Back Cover

- Remove the two 8 mm Phillips #0 screws on the back cover.

⚠️ The motherboard is attaching the two covers together, so don't separate them entirely just yet.

ⓘ There is a button that loosens as the Phillips screws are removed. Don't be alarmed if it falls out.

Step 2

- Remove the four 6mm Phillips#0 screws connecting the motherboard and front cover.

⚠️ **DO NOT** detach the wire connecting the motherboard to the front cover.
Step 3 — USB Connection

- Grasp the white wire connector on the back of the motherboard to remove the USB cable.

- Wiggle the connector back and forth to remove it from the socket.

Step 4

- Desolder the joint on the front of the motherboard to completely detach the USB cable.

- ⓘ Follow this link to learn how to properly solder and desolder your parts.

To reassemble your device, follow these instructions in reverse order.
