Step 1 — Cooling Fan

- Remove the six 1.2mm screws on the bottom plate of the laptop using a JIS #0 screwdriver.
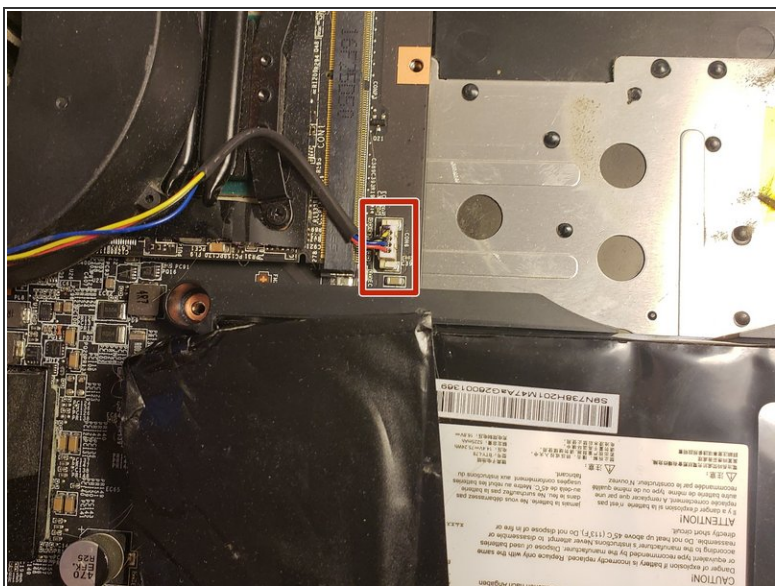

Step 2

- Insert the plastic opening tools into the seam on the back plate of the laptop.

⚠️ A popping sound may come from your device while you remove the backplate.

- Pry the back plate up.

- Slide the plastic opening tool around the laptop's edge slowly until the backplate is completely removed.

Step 3

- Remove the three 2.0mm screws using the JIS #0 screwdriver.

Step 4

- ⓘ The white plastic clip secures the fan wires to the laptop.

- Unplug the white clip by grasping it and wiggling it back and forth .

- ⓘ Do not pull the clip out by the wires themselves.
