INTRODUCTION

If you experience any issues with fans not working properly or not functioning at all, this guide will help you remove them from the computer for inspection or replacement.

🔧 **TOOLS:**

- Phillips #0 Screwdriver (1)
Step 1 — Fans

- Remove the seven 6 mm Phillips #00 screws on the back cover of the laptop with the PH0 Bit screwdriver.

- (i) Every screw in this guide can be removed with the same PH0 Bit screwdriver.

Step 2

- Lift the back cover off by lifting by the tab on the bottom of the cover as indicated.

Step 3

- Detach the two indicated wires by pulling upward on them.

Step 4

- Unscrew a total of four 10mm Philips #00 screws (two screws per fan) as indicated.

To reassemble your device, follow these instructions in reverse order.
