Step 1 — I/O Board

- Remove the small rubber gasket from the corner of the upper case nearest the the I/O board.

- Remove the gasket from the corner nearest display cable connector.

Step 2
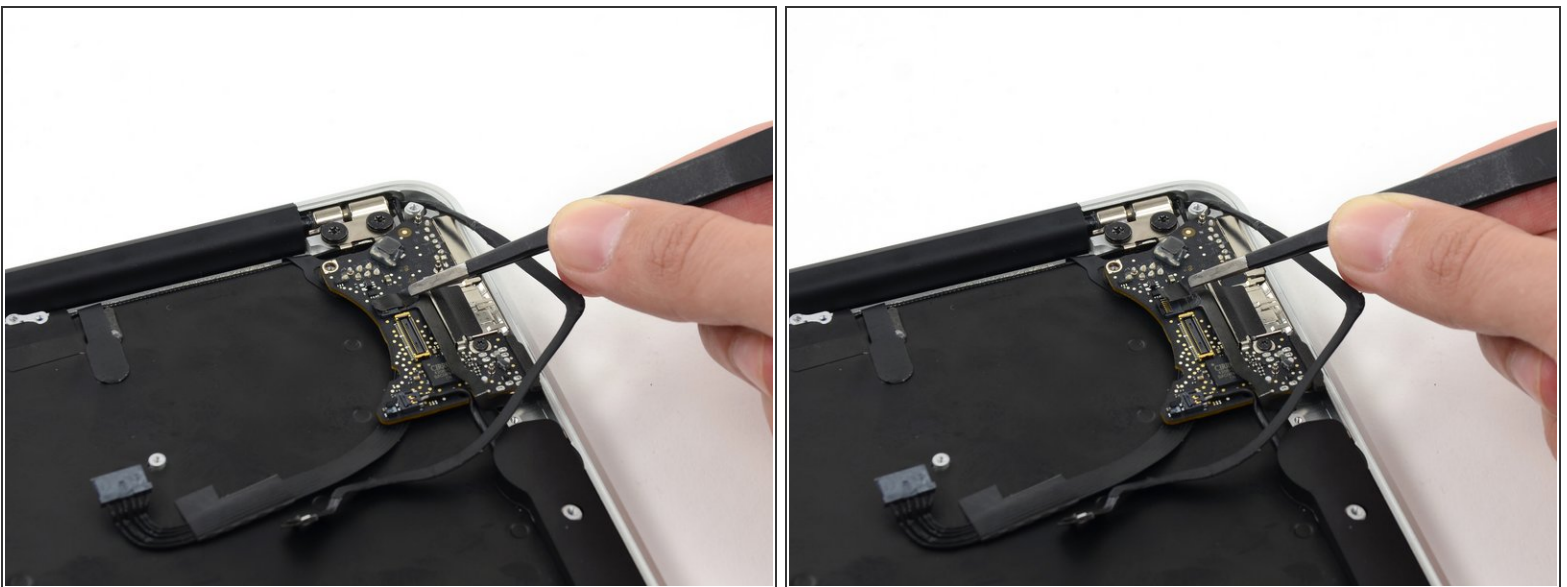

ⓘ If necessary, use tweezers to remove any tape covering the microphone cable ZIF connector.

Step 3

- Use the tip of a spudger to carefully flip up the retaining flap on the microphone cable ZIF socket.

⚠ Be sure you are prying up on the retaining flap, **not** the socket itself.

- With a pair of tweezers, pull the microphone ribbon cable straight out of its socket.

Step 4
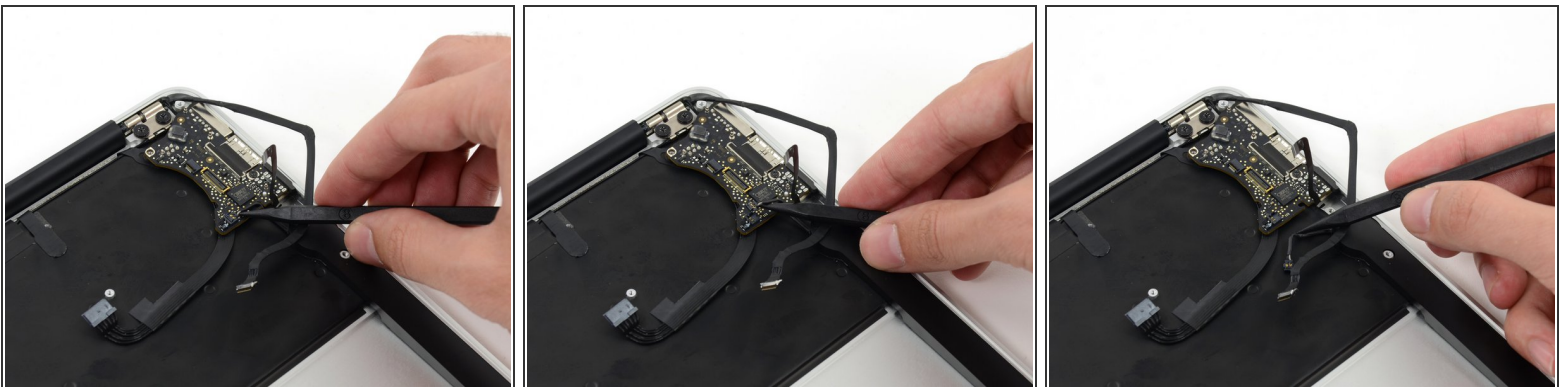

- Use the tip of a spudger to pry under the speaker cable near the connector, lifting it straight up from its socket.

- De-route the cable from its notch in the logic board.

Step 5
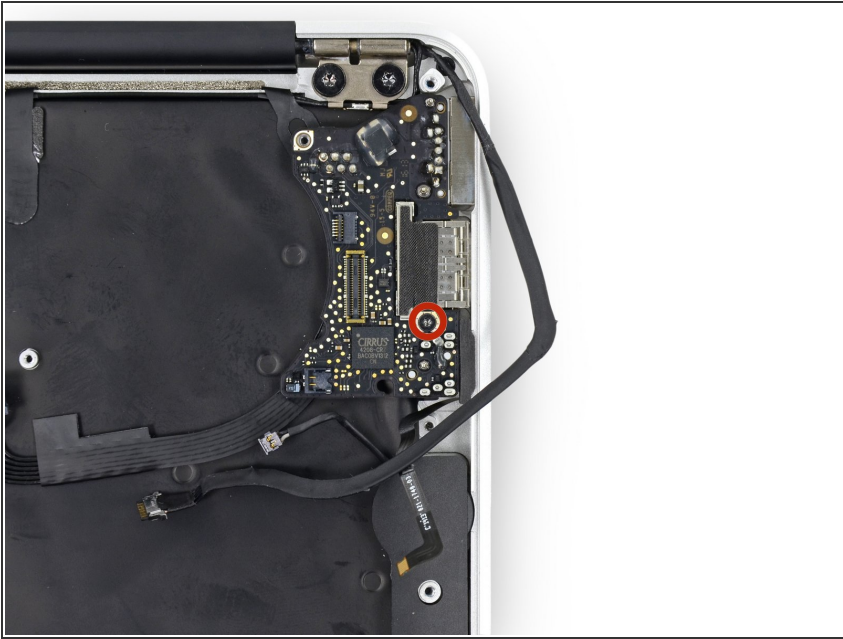

- Remove the single 3.6 mm T5 Torx screw securing the I/O board to the upper case.

Step 6

- Carefully lift the I/O board by its power cable and pull it away from the edge of the case.

To reassemble your device, follow these instructions in reverse order.
