INTRODUCTION

Teardown to show how it's put together.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [Spudger](#) (1)
 - [T3 Torx Screwdriver](#) (1)
-

Step 1 — MacBook Core 2 Duo Rechargeable Battery Teardown

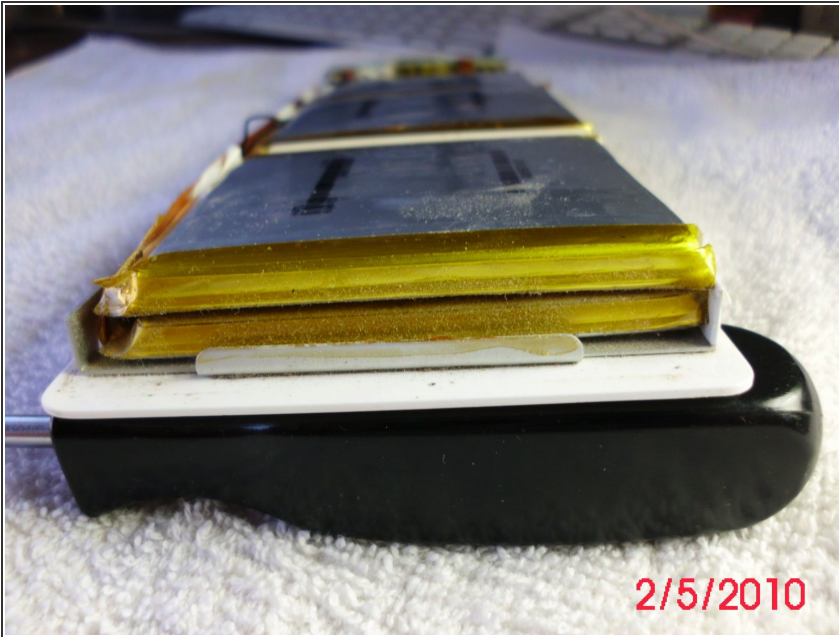

- There are 10 Torx T4 screws
- Five one each side

Step 2

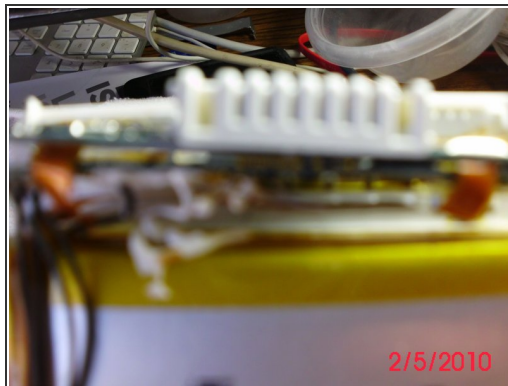

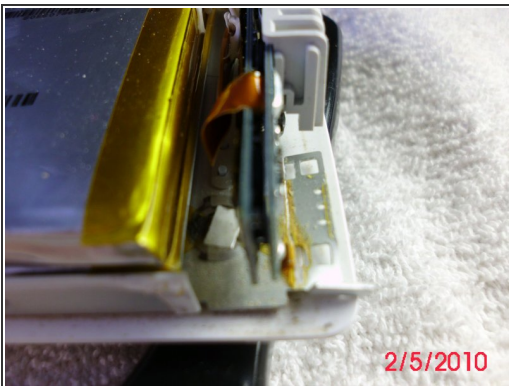

- The metal bottom plate has some glue on it around the connector end. The opposite end can be lifted to help break it loose. It fits straight down.
- Note the built in slots to hold connector cards on the end.
- The interior holds six battery packs. Three stacks of two.

Step 3

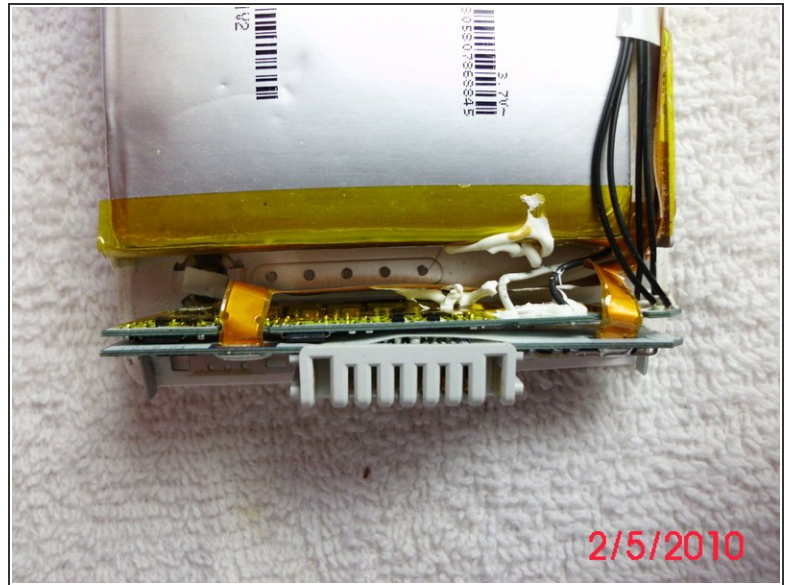

- Here you can see the stacks.

Step 4

- Here you can see the two connector boards.
- The white paste looking stuff is where the battery pack broke open and leaked.

Step 5

- Here's a side and top view of the connector boards.

To reassemble your device, follow these instructions in reverse order.
