

MacBook Pro 13" Unibody Mid 2009 Battery Replacement

If your battery no longer holds a charge, use this guide to replace it.

Written By: Walter Galan

INTRODUCTION

Use this guide to replace an old or faulty battery and revitalize your MacBook Pro. If your battery is swollen, [take appropriate precautions](#).

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [Spudger](#) (1)
- [Tri-point Y0 Screwdriver](#) (1)

PARTS:

- [MacBook Pro 13" Unibody \(Mid 2009 to Mid 2012\) Replacement Battery](#) (1)

Step 1 — Lower Case

- Remove the following 10 screws securing the lower case to the MacBook Pro 13" Unibody:
 - Seven 3 mm Phillips screws.
 - Three 13.5 mm Phillips screws.

Step 2

- Slightly lift the lower case and push it toward the rear of the computer to free the mounting tabs.

Step 3 — Battery

- Remove the following tri-point screws securing the battery to the upper case:
 - One 5.5 mm tri-point screw.
 - One 13.5 mm tri-point screw.

Step 4

- Use the flat end of a spudger to lift the battery connector up out of its socket on the logic board.
