

MacBook Pro 15" Retina Display Mid 2012

AirPort Board Replacement

Replace the AirPort Board in your MacBook Pro 15" Retina Display Mid 2012.

Written By: Jake Devincenzi

INTRODUCTION

Having connectivity issues? Use this guide to replace the AirPort board.

TOOLS:

- MacBook Pro and Air 5-Point Pentalobe Screwdriver (1)
- Spudger (1)
- T5 Torx Screwdriver (1)

PARTS:

- MacBook Pro 13" and 15" (Late 2012/Early 2013) Retina Airport/Bluetooth Board (1)

Step 1 — Lower Case

- Remove the following P5 pentalobe screws securing the lower case to the MacBook Pro:
 - Eight 3.0 mm
 - Two 2.3 mm

Step 2

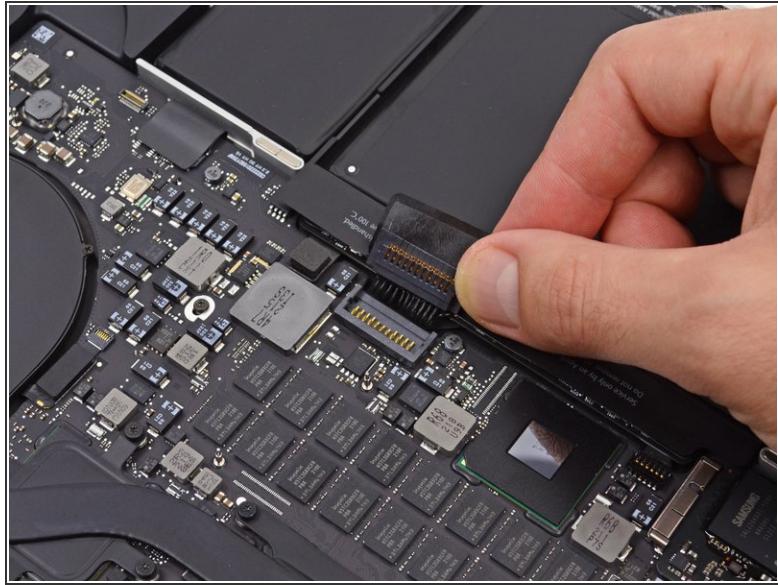

- Lifting from the edge nearest the clutch cover, lift the lower case off the MacBook Pro.
- Set the lower case aside.

Step 3 — Battery Connector

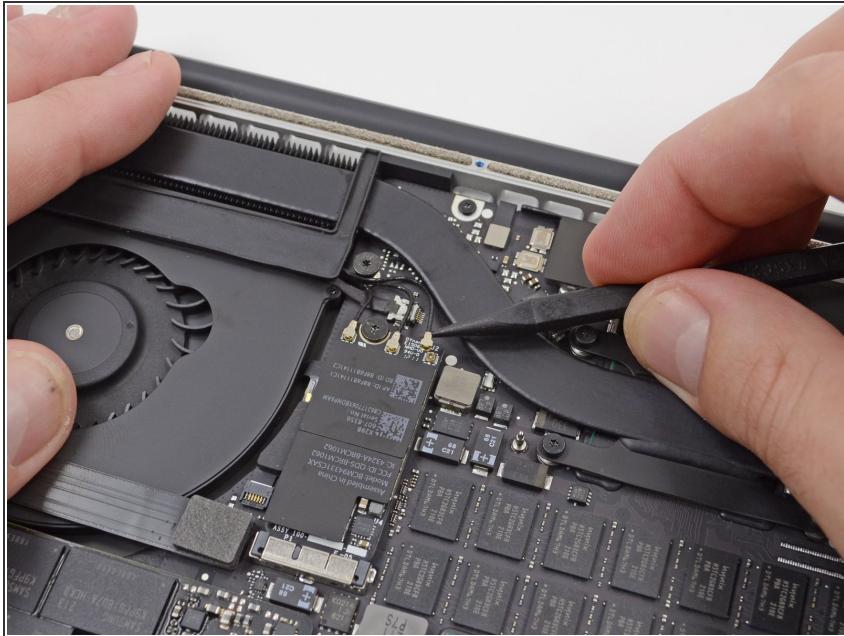

- Peel back the warning label covering the battery connector.

Step 4

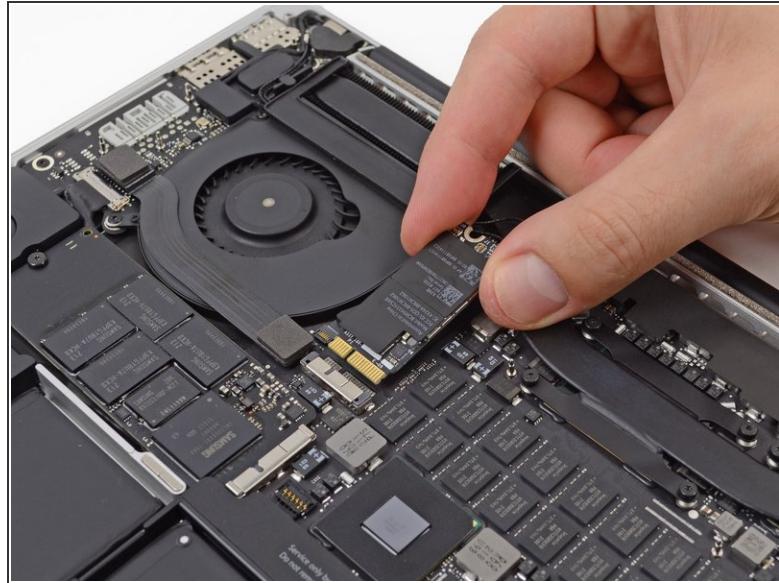

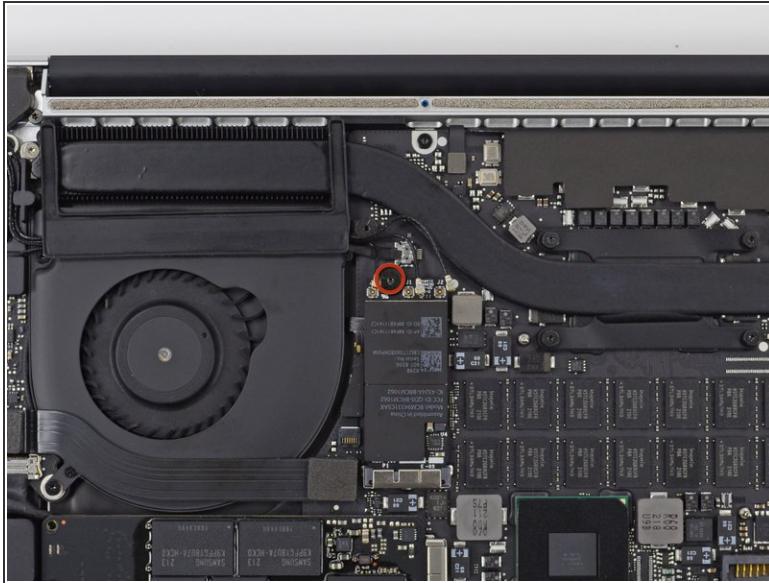

- Using the flat end of a spudger, gently pry the battery connector straight up out of its socket on the logic board.
- Bend the battery cables back and out of the way, ensuring that the battery connector doesn't accidentally make contact with the logic board.

Step 5 — AirPort Board

- Use the tip of a spudger to detach the three antenna connectors up from their sockets on the AirPort board.

Step 6

- Remove the single 2.9 mm T5 Torx screw securing the AirPort board to the logic board.
- Grasp the edges of the board and slide it out from its connector.
- Lift and remove the AirPort board.

To reassemble your device, follow these instructions in reverse order.
