

MacBook Pro 15" Unibody Mid 2012 Disable 2nd GPU to prevent white screen or green stripes during boot process.

How to fix MacBook Pro white screen. Green stripes and white screen GPU issue.

Written By: Cherry

Step 1 — MacBook Pro 15" Unibody Mid 2012 Disable 2nd GPU to prevent white screen or green stripes during boot process.

- 1) Boot Macbook with keys pressed: Command (plus) S
- 2) Wait for active command line
- 3) Enter these 3 commands:
 - `nvrn fa4ce28d-b62f-4c99-9cc3-6815686e30f9:gpu-power-prefs=%01%00%00%00`
 - `nvrn boot-args="-v"`
 - `reboot`
- System should boot without issues.
