INTRODUCTION

Removing a few screws will remove this part and allow access to your RAM.
TOOLS:

- Phillips #00 Screwdriver (1)

PARTS:

- MacBook Pro 17" Memory Door (1)

Step 1 — Battery

- Use your fingers to push both battery release tabs away from the battery and lift the battery out of the computer.

Step 2 — RAM Shield

- Remove the four identical Phillips 3.4 mm screws from the memory door. These screws have 4 mm

diameter heads rather than the 3 mm heads on the body screws.

Step 3

● Lift the memory door up enough to get a grip on it, and slide it toward you, pulling it away from the casing.

To reassemble your device, follow these instructions in reverse order.
