INTRODUCTION

If you have message "**Camera failed**"

First of all try this: Open Camera app from the "Application manager" and do "Clear data", then restart the phone.

Second: Do a Factory reset (of course save your data!).

Third: Reinstall Android OS.

If this not help you, you have a hardware problem. You need to change the camera.

Also you can test the camera from the Hidden / Test menu. Enter this code at the dealer: *#0*#

TOOLS:

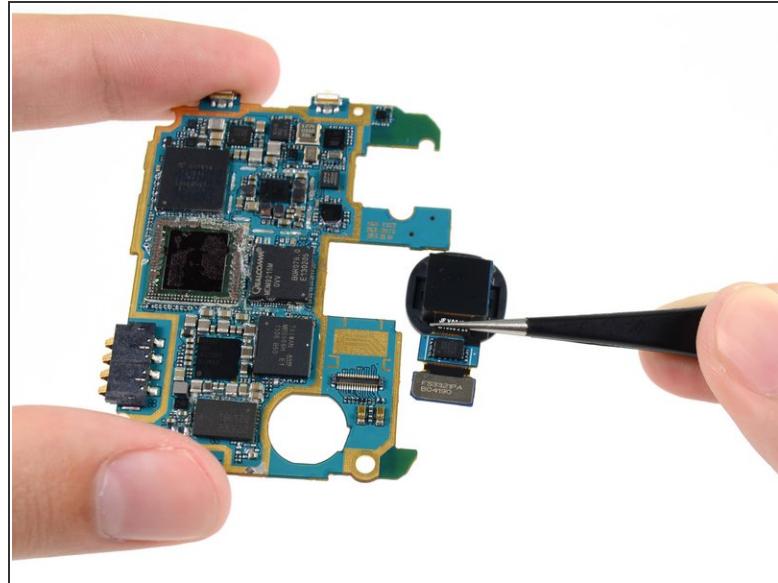

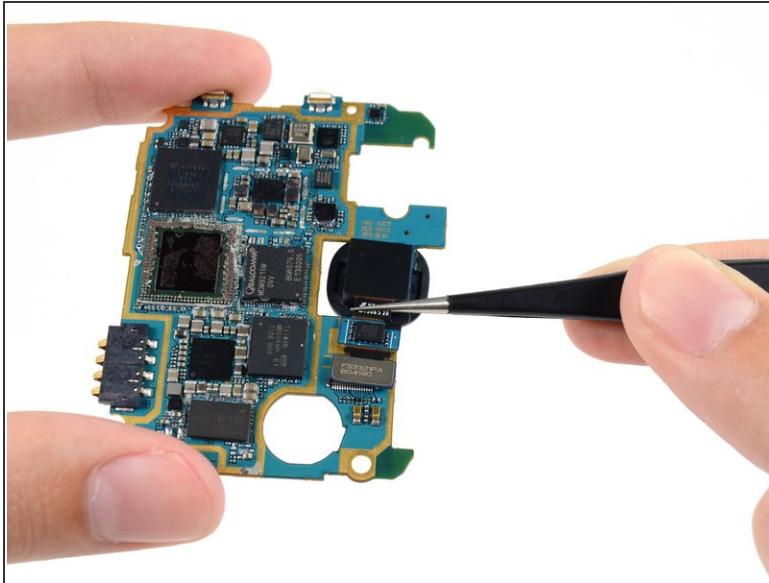

- [Phillips #0 Screwdriver](#) (1)
- [iFixit Opening Picks set of 6](#) (1)

Step 1 — Rear Facing Camera

- Use the flat end of a spudger to disconnect the rear-facing camera connector.

Step 2

- Using tweezers, or your fingers, slide the rear-facing camera out of its notch in the motherboard.

To reassemble your device, follow these instructions in reverse order.
