

# Microsoft Surface Pro Kickstand Replacement

This guide will help you remove the kickstand and install a new one back onto the Microsoft Surface Pro

Written By: Mark

## INTRODUCTION

This replacement guide will help you with the following:

Completely remove the old kick-stand and install a new one.

### TOOLS:

- T5 Torx Screwdriver (1)

### PARTS:

- Surface Pro Kickstand (1)

## Step 1 — Kickstand

- Turn the tablet so the back is facing up.
- Lift the kickstand to access the screws.
- Remove the two T5 Torx screws:
  - One from the left hinge
  - One from the right hinge

## Step 2

- To remove the kickstand, gently pull up until the three tabs slide out of the slots on the back of the device.

To reassemble your device, follow these instructions in reverse order.
