# INTRODUCTION

Daughterboard cover prereq only

---

## TOOLS:

- [Spudger](#) (1)
  - [Phillips #00 Screwdriver](#) (1)
  - [iFixit Opening Picks set of 6](#) (1)
-

## Step 1 — Back Cover

 Power off your phone before beginning disassembly.

- Insert a thumbnail, or spudger, into the notch on the bottom right to start separating the phone unit from the back cover.
- Move to the bottom left corner and pry the phone unit out of the back cover until you can get a good grip.

## Step 2

- Lift the phone out of the back cover.

## Step 3 — Battery

- Use a spudger or fingernail to lift the battery starting at the notch on the bottom left.
- Lever the battery out of its recess and remove it.

## Step 4 — Daughterboard Cover

- Remove the six 3.1 mm Phillips #00 screws securing the daughterboard cover.

## Step 5

- Apply a spudger to the right side of the daughterboard cover.
- Twist the spudger sideways to pry up the daughterboard cover until you get a good grip.
- Remove the daughterboard cover.

To reassemble your device, follow these instructions in reverse order.
