

# Motorola Droid RAZR HD Rear Facing Camera Replacement

A guide to replacing the rear camera of the Droid RAZR HD.

Written By: Ryan Meinhardt

## INTRODUCTION

You just came back from vacation in Hawaii, but because your rear camera wasn't working, you didn't get a single picture. With this guide, you can make sure this doesn't happen again.

### TOOLS:

- [iFixit Opening Tools](#) (1)
- [T4 Torx Screwdriver](#) (1)
- [Tweezers](#) (1)

## Step 1 — Front Panel Assembly

**⚠** Power off the device before disassembly to avoid damage or harm from electrical surges.

- Remove the two 4.5mm screws in the bottom left and right corners of the device using a T4 Torx Screwdriver.

## Step 2

- Holding the device in your hand, push the screen towards the top of the phone until it disconnects from the base of the phone.

## Step 3

- Use a plastic opening tool to lift the screen from the phone.

**⚠** Do not try to completely detach the screen; cables are still connected to the device and can be damaged.

## Step 4

- Use tweezers to remove the yellow tape covering the lcd/digitizer cable connector.
- Carefully lift up the black locking tab to release the lcd/digitizer cable.

**i** The cable connector is located on the bottom right section of the phone.

## Step 5

- Lift up the screen further to reveal another cable at the top of the device connecting the motherboard to the screen.
- *(i)* This connector is located on the top right section of the phone.
- Use tweezers to lift the black bar on top of the ZIF connector.
- Pull the ribbon cable out of the connector with tweezers.
- Now that there are no cables connecting the screen to the motherboard, remove the screen.

## Step 6 — Rear Facing Camera

- Remove the two 3.5mm Torx T4 screws securing the rear facing camera.
- Using tweezers, remove the metal shield protecting the rear facing camera.

## Step 7

- Use a plastic opening tool to lift up the rear camera.
- Use tweezers to lift and unlock the black bar on top of the rear camera's ZIF connector.
- Pull the camera out of the connector.

*(i)* You will need to unplug the rear camera from its connector on the motherboard.

To reassemble your device, follow these instructions in reverse order.
