Step 1 — Battery

- Using your finger, press down on the clip holding the back cover on

- Pull the back cover off.

Step 2

- Place thumb and index finger in the spaces on either side of the battery.

- Pull battery out.

Step 3 — Top Panel

- Use the plastic opening tool to pull peel back screen cover.

- Gently peel back the screen cover from the speaker slit.

- Using the T6 Torx-screwdriver, remove the four 4.3 mm screws from the top panel.
Step 4

- Using the flat end of the plastic opening tool, insert it underneath the plastic cover on the top right corner.

- Move the opening tool around the phone counter clockwise.

- Pop the plastic cover off by twisting the plastic covering tool.

Step 5

- Using a flat head screwdriver, insert it between the metal logic board casing and the top portion of the phone

- Move the plastic opening tool around the phone until part of the casting is popped off.

- You will need to pop in the four plastic fasteners individually from the metal casing to remove it

- Be careful not to rip the cable ribbons that are attached to the logic board and casing

Step 6

- Use the flat end of the plastic opening tool to unclip the cable ribbon from the logic board

Step 7

- You now have the top panel completely detached.

To reassemble your device, follow these instructions in reverse order.
