

# Motorola Moto G 2nd Generation Rear Camera Replacement

Motorola Moto G 2nd Generation Rear Camera Replacement.

Written By: Sophia

## INTRODUCTION

This guide shows you how to replace the rear camera in a Motorola Moto G 2nd Generation smartphone.

### TOOLS:

- [T5 Torx Screwdriver](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Rear Camera

- Remove back cover.

## Step 2

- Remove back frame. The screws feature different sizes and lengths, so keep them in order after removing them.

## Step 3

- Release SIM&SD card reader assembly connector, battery connector and vibrator at first.

## Step 4

- Loosen kinds of sticker under the battery and remove it with card reader assembly together.

## Step 5

- Release LCD screen connector.

## Step 6

- Release front camera connector and sensor connector.

## Step 7

- Remove three screws on the motherboard and take away the motherboard.

## Step 8

- Remove the rear camera from motherboard.

To reassemble your device, follow these instructions in reverse order.
