

# Motorola Moto G5 Motherboard Replacement

Use this guide to replace a broken or faulty motherboard.

Written By: Luis Garcia

# INTRODUCTION

This guide will help with the replacement of a broken or faulty motherboard.

## TOOLS:

- [Spudger](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Tweezers](#) (1)
  - [Phillips #00 Screwdriver](#) (1)
-

## Step 1 — Back Cover

- Insert your fingernail or the flat end of a spudger into the notch on the bottom edge of the phone near the charging port.
- Pry with your fingernail or twist the spudger to release the back cover from the phone.

## Step 2

- Insert the flat end of a spudger into the seam and slide it along the bottom edge to release the clips holding the back cover to the phone.

### Step 3

- Continue sliding the flat end of the spudger along the seam for the remaining sides of the phone.

### Step 4

- Lift the back cover and remove it from the phone.

- ☑ To reinstall the back cover, align the cover with the phone and squeeze along the edges to snap the clips back into place.

## Step 5 — Battery

- Insert your fingernail or the flat end of the spudger into the notch below the battery.
- Pry with your fingernail or spudger until you free the battery from its recess.

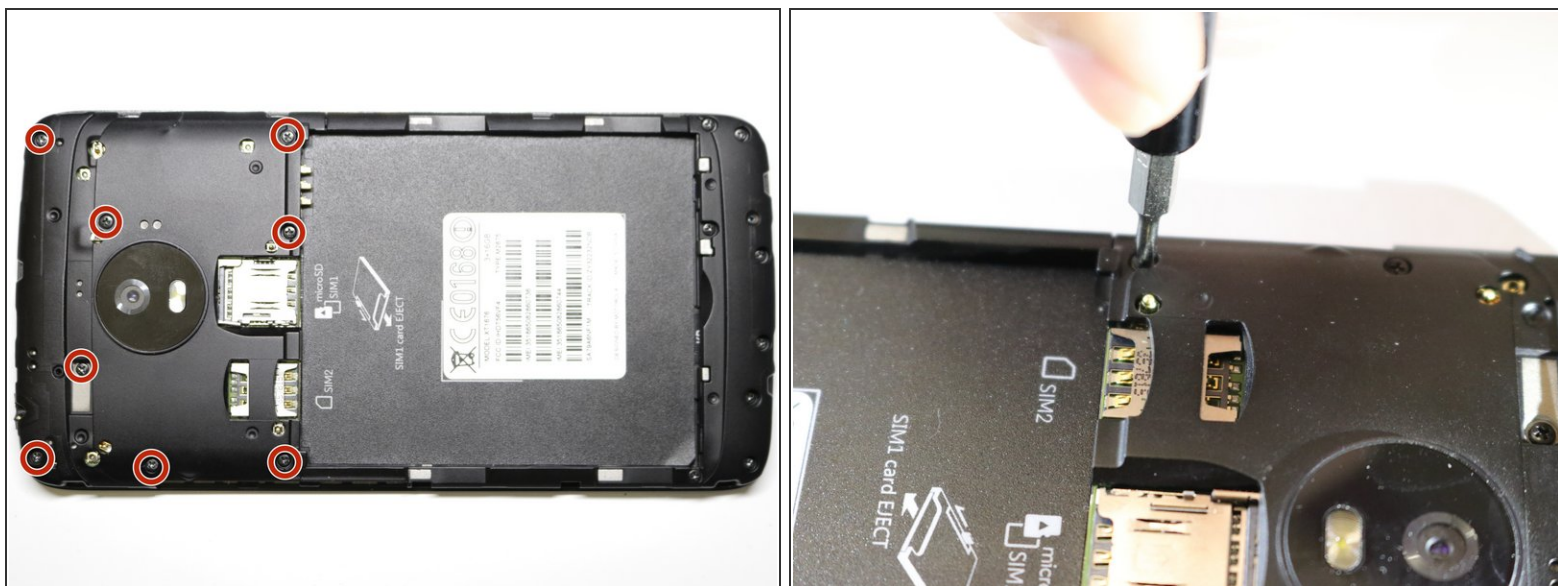

## Step 6

- Remove the battery.
- ★ When installing the battery, make sure the battery's contacts line up with the three gold pins on the top right.

## Step 7 — Rear Facing Camera

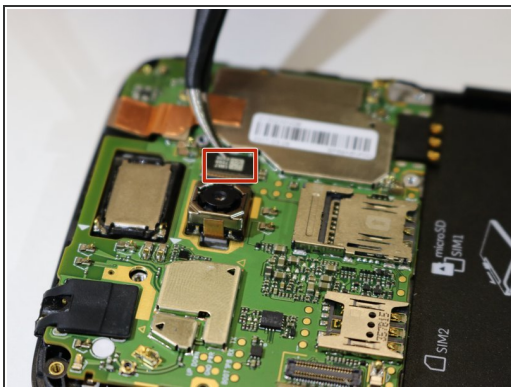

- Remove the eight (8) 4mm screws with a Phillips screwdriver.

## Step 8

- Pry the top motherboard cover off using a plastic opening tool.
- ⓘ When prying it open, make sure to pry it around evenly so that the cover will not snap. This will require some force.

## Step 9

- Disconnect the marked connector with a pair of tweezers and remove the camera piece.

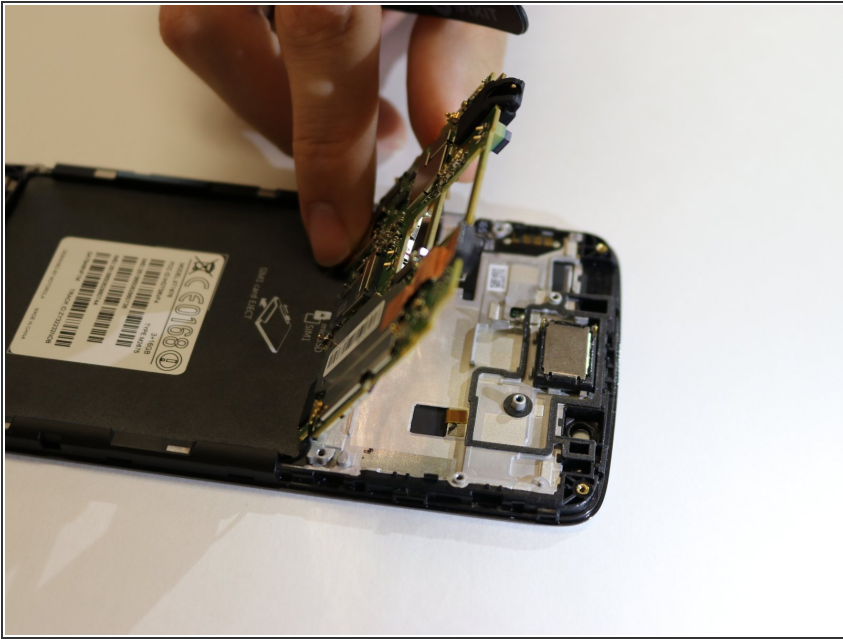

## Step 10 — Motherboard

- Remove the two 4mm screws shown in the picture using a Phillips #00 screwdriver.

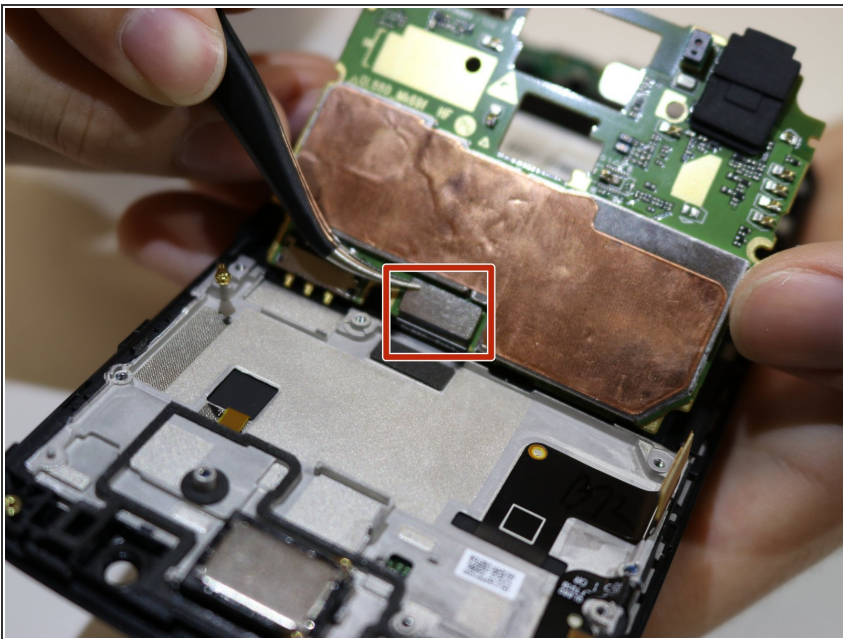

## Step 11

- Lift the motherboard up from the top of the phone.

## Step 12

- Unplug the back connector from the motherboard using tweezers.

To reassemble your device, follow these instructions in reverse order.
