Motorola Moto G7 Play Back Cover Replacement

Use this guide to remove the back cover of your Motorola Moto G7 Play.

Written By: Justin Ogihara

INTRODUCTION

You'll need to use a heat gun or some heat source to heat up the glue and adhesive holding the back cover to your device. Should you use a heat gun or hair dryer, make sure that the heating device is at least six inches away from the device to prevent the device/battery from overheating.

TOOLS:

- iFixit Opening Picks set of 6 (1)
- iFixit Opening Tools (1)

Step 1 — Back Cover
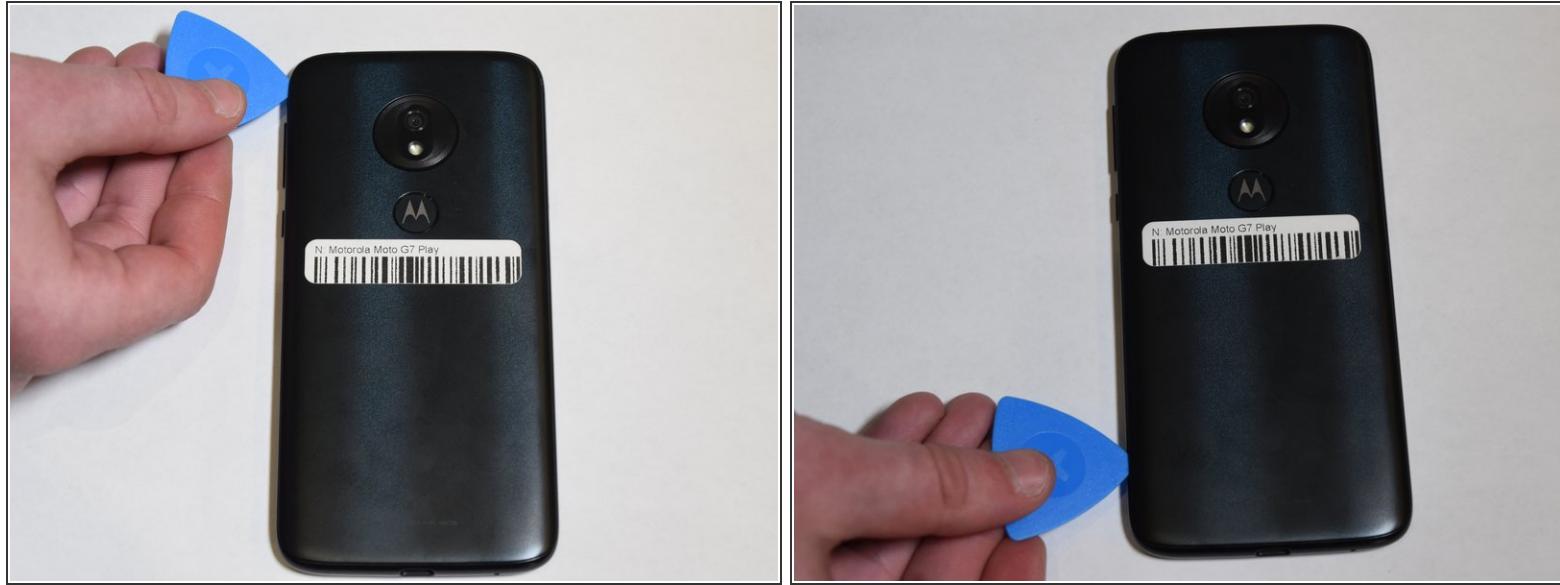

⚠ Turn off your device before you begin.

- Use the iFixit pick to break the adhesive around the back case.

ⓘ Use a heat gun, hairdryer, or iOpener to weaken the adhesive around the back case. If you're using the iOpener, please review the [instructions](#) for proper use.

Step 2
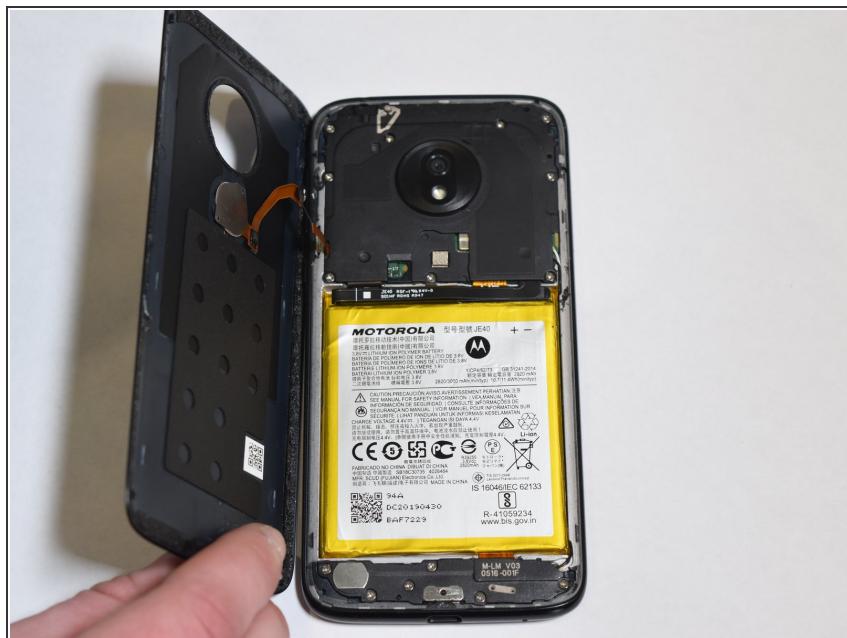

- Detach the back case from the phone.

⚠ Make sure the back is opened right to left so the cable of the fingerprint scanner does not get damaged.

Step 3

- Use the iFixit pick and the iFixit opening tool to pull the fingerprint scanner off of the back case.

To reassemble your device, follow these instructions in reverse order.
