

Motorola Moto X 2nd Generation Back Cover Replacement

Written By: Sophia

INTRODUCTION

[video: <https://www.youtube.com/watch?v=5RG67ZZe0ps>]

TOOLS:

- T3 Torx Screwdriver (1)
- iFixit Opening Picks set of 6 (1)
- Motorola Eject pin (1)

PARTS:

- Motorola X 2014 back cover (1)

Step 1 — Back Cover

- Remove SIM card tray.

Step 2

- Insert the eject pin into the hole in the SIM card tray port and push the back cover with effort to open a gap.
- Place the guitar pick into the gap.

Step 3

- Slide the guitar pick to cut the adhesive sticker under the back cover. It's a little strong.
- At last, peel off the soft back cover. If you get the new back cover without the logo ring, you need to remove the logo ring from old back cover.

To reassemble your device, follow these instructions in reverse order.
