

Motorola Moto X4 Battery Replacement

Remove and replace your Moto X4 battery.

Written By: Brian Buchanan

INTRODUCTION

The official guide has been updated and can be found [here](#). This guide is archived for historical purposes.

This guide has one prerequisite since the display needs to be removed.

If your battery is swollen, [take appropriate precautions](#).

TOOLS:

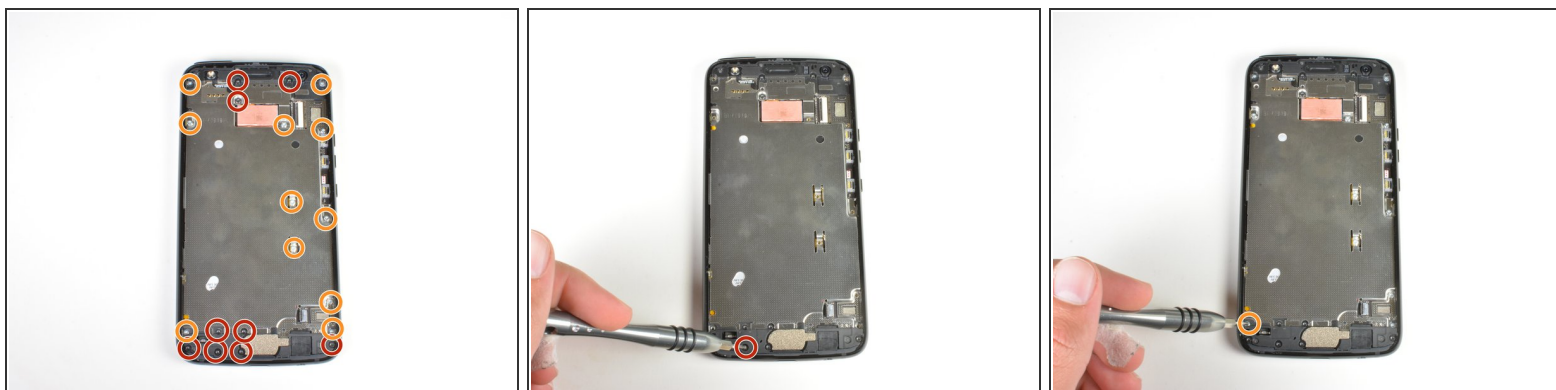

- [iOpener](#) (1)
- [Spudger](#) (1)
- [T4 Torx Screwdriver](#) (1)
- [T3 Torx Screwdriver](#) (1)
- [Tweezers](#) (1)

PARTS:

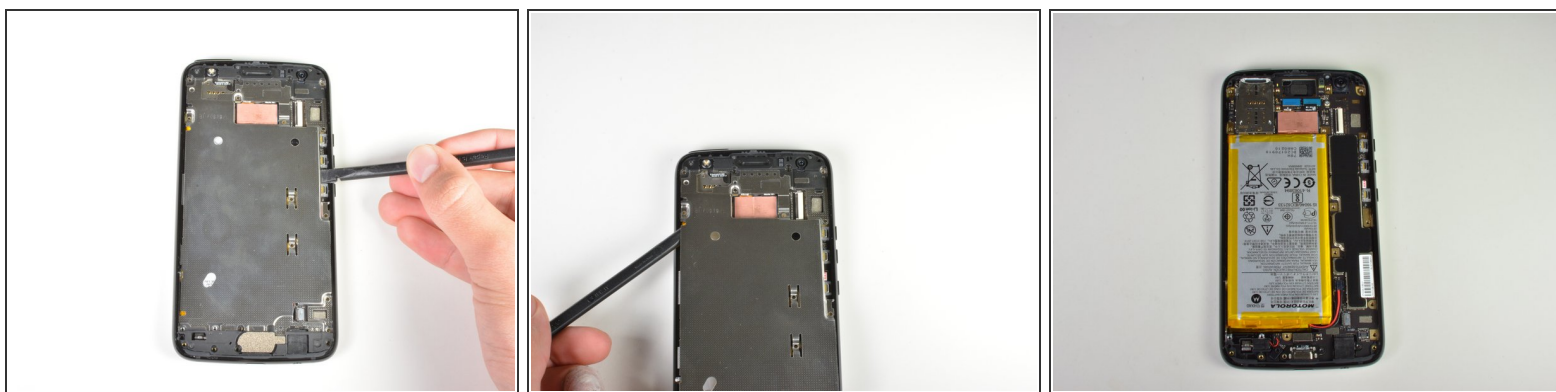

- [Motorola Moto X4 Replacement Battery](#) (1)

Step 1 — Battery

- Remove the nine 3mm T4 Torx screws securing the silver plate to the device.
 - Remove the eleven 2mm T3 Torx screws securing the plate to the device.
- ⚠ Incorrect placement of these screws during reassembly will cause permanent damage to your device's motherboard.

Step 2

- Use the flat end of a spudger to pry up the silver plate from both sides.
 - Remove the plate from the device.
- ⓘ Several clips hold the plate in place so there may be a clicking sound.

Step 3

- Use a pair of tweezers to gently lift the battery connector wire.

Step 4

- Use the flat end of the spudger to gently pry the battery from all sides from its casing.

The battery is secured to the motherboard with a mild adhesive. Peel slowly; be careful to not puncture or twist the battery.

To reassemble your device, follow these instructions in reverse order.

After completing this guide, [calibrate your newly-installed battery](#).
